Training Documentation Form

Location: _____ Date: _____

Name of Person Conducting Training: _____

Coating Safety

Before starting any coating job, a Job Safety Analysis should be performed based on the MSDS sheet and suggested engineering controls for the specific coating. More general coating safety guidelines that should be followed are listed below.

- Review the MSDS sheets completely.
- Be sure to have an emergency procedure.
- Use approved containers and tanks for the storage and handling of the liquids.
- Utilize engineering controls: i.e., make sure the area where coating is properly ventilated.
- Wear appropriate personal protection clothing and equipment including but not limited to safety glasses, gloves, coveralls, and appropriate respiratory protection.
- Follow all Respiratory Protection Program guidelines, including training, selection of proper respirators, medical evaluations, and fit testing.
- Keep away from heat, sparks, open flames, and oxidizing agents.
- Store in a cool, dry place with adequate ventilation.
