THE PRECAST SHOW
A Concrete Partnership

HawkeyePedershaab expands its presence in the precast concrete equipment market with the acquisition of New Hampton Metal Fabrication, market leader in the precast form industry.

The partnership draws on decades of combined experience to push the boundaries of innovation while maintaining our dedication to delivering outstanding customer service to the industries we serve.

The addition of New Hampton Metal Fab broadens HawkeyePedershaab’s reach and offerings to customers by combining the technology and service leaders in dry-cast and wet-cast form equipment.

TRADE SHOW SCHEDULE

TRADE SHOW HOURS
Colorado Convention Center Exhibit Hall

**Thursday, Feb. 22**  2:00 p.m. - 7:00 p.m.
The Precast Show Grand Opening
_Grand opening for all trade show attendees; includes hors d'oeuvres and host bar from 4:00 p.m. - 7:00 p.m._

**Friday, Feb. 23**  11:00 a.m. - 5:00 p.m.
Buffet Lunch on trade show floor from Noon - 1:30 p.m.

**Saturday, Feb. 24**  10:00 a.m. - 1:00 p.m.
Brunch on trade show floor from 11:00 a.m. - Noon
Includes bloody marys and mimosas

Discover Denver City Tour

Thursday, Feb. 22 • 9:00 a.m. – 11:15 a.m.
Meet in the Hyatt Regency Lobby at 8:45 a.m.

- Full Package Member: $65
- Trade Show Only Member: $85
- Nonmember: $85
- Child (12 and under): $25

Experience two sides of Denver — a historic Western town and a thriving modern city — all on the same tour! From downtown, we’ll head east through some of Denver’s loveliest residential areas and two of Denver’s more than 200 parks. We’ll stop for pictures at the Denver Museum of Nature and Science. It’s the perfect spot to capture breathtaking views of the stunning skyline of Denver and the Rocky Mountains. Then we’ll travel to the Denver Zoo, the Denver Botanic Gardens and the Governor’s residence. You will see Denver’s famed sports complexes, the trendy lower downtown district and the Colorado State Capitol building. It’s the perfect introduction to one of North America’s most dynamic cities!

NPCA Keynote Luncheon Featuring Industry Awards and Graduations

Thursday, Feb. 22 • 11:30 a.m. – 1:30 p.m.
CCC, Four Seasons Ballroom

- Full Package Member: $45
- Trade Show Only Member: $65
- Nonmember: $85
- Child (12 and under): $10

In this opening event for The Precast Show 2018, NPCA celebrates winners of the annual Sustainability Awards competition and recognizes anniversaries and top scores among NPCA certified plants. Also honored will be the graduates of the first Leadership NPCA class and the Master Precaster class of 2018.

The awards activities lead into a special keynote address from Karl Mecklenburg, a six-time Pro Bowl linebacker who was a member of three Denver Broncos Super Bowl teams. Considered one of the most versatile players in the NFL during his all-star career, Mecklenburg played all seven defensive front positions from 1983-1994. As an author and speaker, Mecklenburg’s stories of teamwork are both humorous and inspiring, and filled with the same passion and intensity that marked his football career.

The Precast Show Grand Opening

Thursday, Feb. 22 • 2:00 p.m. – 7:00 p.m.
CCC, Halls C&D

Don’t miss our grand opening celebration and reception on the trade show floor. Includes hors d’oeuvres and host bar from 4:00 p.m. – 7:00 p.m. Open to all registered attendees.

Women in Precast Reception

Thursday, Feb. 22 • 7:00 p.m. – 8:30 p.m.
HR, Level 4, Capitol Foyer

This is a special networking reception for women working in the precast concrete industry. Open to all registered female attendees.
Industry Updates on the Trade Show Floor

Friday, Feb. 23 • 1:30 p.m. – 2:30 p.m.
CCC, Halls C&D (Booth #240)

Join us on the trade show floor for updates on these important industry issues:
• NPCA Specifier Outreach
• Microbial Induced Corrosion Research
• OSHA Respirable Silica Standard (effective June 23, 2018)
• OSHA Crane Operator Certification Rule (effective Nov. 10, 2018)
• OSHA Electronic Recordkeeping

NPCA Foundation Student and Professor Networking Event

Friday, Feb. 23 • 3:00 p.m. – 4:00 p.m.
CCC, Upper Lobby D

Join us in the trade show floor foyer (just outside the entrance) at this special event hosted by the NPCA Foundation. This networking event brings together precast industry members, professors and students from the Concrete Industry Management program and engineering schools from around the country. All attendees to The Precast Show are invited to attend this free networking event. Meet with students who will soon be graduating and seeking employment, learn more about setting up an internship program at your facility and learn how you can be a resource for your local construction management or engineering program. It’s a great way to recruit new talent for your company and influence the next generation of precasters.

THE PRECAST SHOW APP:
YOUR TRADE SHOW PARTNER

It’s everything you need to know about The Precast Show 2018 – in your pocket! Download the mobile app and you’ll have all the trade show details at your fingertips. Using the app, you can search exhibitors, find the products you want to see, set appointments with exhibitors, view the list of educational courses and more. If you have a mobile device, it’s an easy way to enhance your trade show experience and make the most of your time in Denver.

Download it from your mobile device’s app store or at precast.org/app.
Precast Postgame Experience at Mile High Stadium

Annual Industry Extravaganza and Networking Event

Saturday, Feb. 24 • 6:30 p.m. – 10:00 p.m.
Meet in the HR lobby at the time listed on your ticket.

- Full Package Member: $115
- Trade Show Only Member: $175
- Nonmember: $205
- Child (12 and under): $55

Join us as we cap off The Precast Show 2018 with the most spectacular party in precast at the iconic Mile High Stadium, home of the three-time Super Bowl champion Denver Broncos. The stadium rocked by John Elway and Peyton Manning is the star of this closing-night attraction. You’ll enter the stadium like a Hall of Famer, greeted by Miles the Mascot, the Stampede Drumline and the Denver Broncos Cheerleaders. And that’s just the start. You will then continue through the player’s tunnel and onto the football field under the stadium lights for a photo opportunity from the perimeter of the field. The event really kicks off at the East Club Level with a casual and delicious buffet dinner, interactive activities such as pingpong, foosball, armchair quarterback, pop-a-shot electronic basketball, air hockey, a rock climbing wall, artic thunder and more. Help yourself to Colorado-crafted beverages, take a behind-the-scenes tour and enjoy live music from the high-energy show band Moments Notice at another Precast Show signature event.
Experience Tracker Helps You Manage Your Contacts

The Precast Show Experience Tracker is a powerful tool that will keep track of your visits with exhibitors and send you an email after the show with a record of your journey.
It’s simple!

Step 1: Have your badge scanned at the booths you visit.

Step 2: Following the show, look for the Experience Tracker email in your inbox with a link to access the customized contact list of exhibitors you met.

It’s an ideal way to make sure you benefit from your time on the trade show floor after you return home.
THE PRECAST SHOW PLANT TOURS

Thursday, Feb. 22 • 6:30 a.m. – 11:00 a.m.
Meet in the HR lobby at time listed on your ticket.
Includes Breakfast Starting at 5:30 a.m.
HR, Level 4, Capitol Ballroom

Full Package Member: $95
Trade Show Only Member: $125
Nonmember: $195

TOUR A

Lindsay Precast Inc. Colorado – Dacono Plant

Plant Hosts: Ed Harkness, operations manager
Ian Forbes-Harlan, project manager

Production Facility Size: 29,000 square feet

Property Size: 35 acres

Number of Employees: 17

Years in Business: 16

Products: Manholes 48-144 inch diameter; Inlets; Water-Quality Structures; Median Barrier; Utility Structures;
Light Pole Bases; VA Burial Vaults; Columbarium Niches;
StoneStrong Systems Retaining Wall

Mixing and Production Equipment: Con-E-Co Lo-Pro
batch plant; Teka 3-yard mixer

Interesting Jobs and Projects: VA and private
columbarium niche projects; RediStair precast stair riser
system for downtown Denver office buildings; 12-foot-
diameter wet well

Cameras Allowed: Yes

Vaughn Concrete Products Inc.

Plant Hosts: Johnie and Pat Vaughn, founders
Mike Vaughn, Karen Vaughn, Adam Vaughn, Sydney
Vaughn and Ann Ritchie

Production Facility Size: Approximately 40,000 square
feet inside and 80,000 square feet outside

Property Size: 40 acres

Number of Employees: 30

Years in Business: 54

Products: Precast Vaults from 2’ x 2’ to 14’ x 30’; Electrical
and Communication Manholes and Pullboxes; Catch
Basins; U Culvert; Short Span Bridges; Retaining Walls;
Septic Tanks; Grease Interceptors; Cattle Guards; Barriers

Mixing and Production Equipment: Self-made semi-
automated batching system; Teka 3-yard mixer

Interesting Jobs and Projects: All-precast stream
crossings; trash enclosures; utility tunnel and mechanical
room for University of Colorado dormitory; steam vaults
used as thrust anchors for University of Wyoming;
underground pedestrian crossing components for
Colorado State University

Cameras Allowed: Yes
Front Range Precast Concrete Inc.

**Plant Hosts:** Doug Jatcko, owner  
Keith Dorwart, technical sales

**Production Facility Size:** 10,000 square feet  
**Property Size:** 4 acres  
**Number of Employees:** 12  
**Years in Business:** 40 (2 years in the current location)

**Products:** FLXX Watertight Concrete Tanks as Sand/Oil and Grease Interceptors; Onsite Wastewater Treatment and Cisterns for Potable Water Storage and Fire Protection; Transpan Bridges; Prefabricated Traffic and Pedestrian Bridges

**Mixing and Production Equipment:** Partnering with a local ready-mix supplier, FLXX Watertight Concrete Tanks are produced by the first-generation precast HALO automation equipment. Pumps, siphons and other equipment adding value to their products and tanks are installed at the factory.

**Interesting Jobs and Projects:** The FLXX Fire-Foe, winner of a 2011 Creative Use of Precast Award; wild animal shelters for lions, tigers and bears

**Cameras Allowed:** Yes

Rocky Mountain Prestress

**Plant Hosts:** Jake Lei, structural plant superintendent  
Keo McBroome, architectural plant superintendent

**Property Size:** 55 acres structural; 35 acres architectural  
**Number of Employees:** 390  
**Years in Business:** 59

**Products:** Structural – Double Tees, Beams, Columns, Wall Panels, Flat Slabs, Stairs, Girders. Architectural – Wall Panels, Spandrels

**Interesting Jobs and Projects:** Village Center Station 2; Colorado Center 3; One Belleview Station, 1700 Platte; Starz Encore; Aurora Justice Center; 16 Chestnut; The Platform

**Cameras Allowed:** Yes
RELAX!

Take a break in The Bookstore located on the show floor.

- Shop at The Bookstore

Starting with the fundamentals of precast concrete production and progressing through advanced technical, safety and leadership topics, NPCA’s Precast University offers a comprehensive series of precast-specific training courses for anyone who wants to advance in the industry. Precast University brings together all NPCA’s Production & Quality School courses in a career path that concludes with an industry-recognized certification – the Master Precaster designation.

Taught by leading industry experts, PQS courses dive deep into topics in concentrated learning sessions during The Precast Show. Some PQS courses are available online or by webinar, with in-person courses occasionally offered in locations throughout North America. Courses include:

- Production & Quality School (PQS I)
- PQS II – Safety
- PQS II – Production
- PQS II – Technical
- PQS II – Quality Control
- PQS III – Leadership

Completing the curriculum earns the participant the designation of Master Precaster, with a graduation ceremony held each year during The Precast Show. For complete information, visit precast.org/education.

As part of its mission to develop comprehensive educational resources for the precast concrete industry, NPCA provides plant personnel with in-depth learning opportunities taught by expert industry instructors as part of Precast University. Comprised of special-topic schools, Precast University courses involve a multi-day commitment that includes extensive curriculum and an exam.
PQS – Production and Quality School Level I (PQSI)

Mel C. Marshall, P.Eng.,
Mel C. Marshall Industrial Consultants Inc.
Eric Carleton, P.E., NPCA

Production and Quality School (PQS I) is Precast University’s flagship course, and is the perfect starting point to provide plant personnel with the fundamentals of quality precast concrete manufacturing. Designed especially for all production personnel and QC inspectors, this course covers all aspects of manufactured concrete production, from raw materials to post-pour inspection, with special emphasis on maintaining high quality throughout the entire manufacturing process. This course satisfies the plant certification requirement of the current edition of the NPCA Quality Control Manual for Precast Concrete Plants.

Attendees who successfully complete PQS Level I will be able to:
• Identify the key components for making quality precast concrete and proper handling techniques for each
• Describe in detail the entire manufacturing process of producing quality precast concrete from pre-production to post-production
• Calculate the impact of temperature of aggregates, cement and water on concrete mixes
• Convert metric reinforcement bar sizes to ASTM standard reinforcing bar sizes
• Explain the fundamental elements of a quality concrete mix design and troubleshoot potential mix design flaws
• Create a quality control manual specific to plant production practices while incorporating industry best practices

PQS I
Tuesday, Feb. 20 (Day 1)
8:00 a.m. – 5:00 p.m.
Location: CCC, Room 703

PQS I
Wednesday, Feb. 21 (Day 2)
9:00 a.m. – 5:00 p.m.
Location: CCC, Room Room 703

Please Note: Participants in this school are required to attend both days of class and pass the exam to obtain a certificate of course completion. Please make your travel arrangements accordingly.
PQS2 – PQS II - Production (PQSII) ▲

Chris Kemp, Smith-Midland Corp.  
David Jablonsky, P.E., FPCI, ALP Supply  
Todd Jones, ALP Supply  
Barry Fleck, ALP Supply  
Todd Spindler, Sika Corp.  
Claude Goguen, P.E., LEED AP, NPCA

PQS Level II - Production is designed for plant personnel who will benefit from a comprehensive understanding of precast-specific production practices in four key areas: lifting and handling, issues related to production practices, lean manufacturing, and patching and repair. This course goes beyond the fundamentals explored in PQS Level I to prepare students to think critically about the links between these four areas and common plant production and safety issues. Course participants will go in-depth in exploring these topics, discussing best practices and learning to address production challenges in their plants. Shift supervisors, team leaders, production managers, batch plant operators, engineering and drafting personnel, and those who aspire to these positions should attend.

Attendees who successfully complete PQS Level II - Production will be able to:

- Explain the key concepts of lean manufacturing and develop an action plan for implementing simple lean techniques upon returning to their plant
- Analyze the current lifting and handling techniques in your plant and assess these techniques to identify potential areas of improvement for plant safety
- Determine the most likely causes of cosmetic and/or structural concrete issues
- Identify the difference between structural and cosmetic repairs and employ the appropriate patching/repair techniques for each

Attendees who successfully complete PQS Level III - Leadership will be able to:

- Employ effective leadership skills in their precast operations
- Adapt management styles to the diverse workforces in precast plants
- Identify effective methods to improve employee performance
- Communicate effectively with all employees – from hourly to senior management

PQS II - Production
Tuesday, Feb. 20 (Day 1)  
8:00 a.m. – 5:00 p.m.  
Location: CCC, Room 705/707

PQS III - Leadership
Tuesday, Feb. 20 (Day 1)  
8:00 a.m. – 5:00 p.m.  
Location: CCC, Room 704/706

PQS II - Production
Wednesday, Feb. 21 (Day 2)  
9:00 a.m. – 5:00 p.m.  
Location: CCC, Room 705/707

PQS III - Leadership
Wednesday, Feb. 21 (Day 2)  
9:00 a.m. – 5:00 p.m.  
Location: CCC, Room 704/706

Please Note: Participants in this school are required to attend both days of class and pass the exam to obtain a certificate of course completion. Please plan your travel arrangements accordingly.

PQS3 – PQS III - Leadership (PQSIII) ▲

Greg Chase, Chase Consulting

Attendees who complete this course will learn valuable leadership principles they can immediately apply to their management style in their precast concrete manufacturing facilities. Learn how to recruit, hire, train and develop employees by communicating effectively, leading by example and celebrating success. Additional topics include time management, goal-setting, stress management and diversity.

Owners, managers, supervisors and those who aspire to hold such positions in the future are encouraged to attend this course.
The Concrete Production Track explores best practices in the precast industry and strengthens attendees’ knowledge of the fundamentals of quality precast concrete. Courses are designed for those involved in the daily production of quality precast concrete products and will include safety and other topics that are appropriate for those seeking a broad range of knowledge in precast production.

Course Level

- Beginner
- Intermediate
- Advanced

**CP1 – Precast Design 101: Skills for Estimating**

*Friday, Feb. 23 • 8:00 a.m. – 10:00 a.m.*

Ronald E. Thornton, P.E., Precast Concrete Association of New York

Location: CCC, Room 703

Contract plans typically show the size and configuration of underground utility, storm and sanitary structures but leave the structural design up to the precast producer. This often creates a challenge for producers who have to estimate the cost of a structure without the benefit of knowing how much concrete and reinforcing will be required. Engaging the services of an outside engineer to provide a preliminary design for pricing purposes is generally prohibitive due to cost and time constraints. This course is intended to provide attendees with basic design skills to estimate concrete thickness and reinforcing requirements for cost estimating purposes. We will review types of loads as defined by ASTM C857 and C890 and apply provisions of ACI 318 in a real-life design example.

**At the conclusion of this course, you will be able to:**

- Review basic concepts related to reinforced concrete design
- Define engineering terms such as live load, dead load, area of steel, moment and shear
- Use ASTM standards to compute design loads applied to underground precast structures
- Estimate concrete thickness and reinforcing requirements using applied design forces and ACI design methodologies

**CP2 – Understanding Delivery Crane Load Charts**

*Friday, Feb. 23 • 8:00 a.m. – Noon*

Rob Scherbarth, OVERTON Safety Training

Location: CCC, Room 706

This course is designed to help crane operators become more familiar with load charts that are commonly used within the precast concrete industry and those that may appear on the national certification written exams required to meet OSHA’s crane certification requirement. This requirement goes into effect Nov. 10, 2018. Students will receive a Delivery Crane Load Chart Study Guide as part of their registration. Additionally, students will have the opportunity to take an exam after the presentation to assess their understanding of load charts and related calculations.

The new precast concrete delivery crane certification will cover telescoping boom trucks under 21 tons and rail/trolley trucks. The written portion of the exam will address a general knowledge of cranes along with specific understanding of delivery cranes. While you may not operate both a telescoping boom truck and a rail/trolley truck, the new exam will cover both types of trucks. Operators taking the exam will need to know how to read and navigate through the load charts associated with both types of trucks, as they will be tested on both types.

**Please Note:** This training does not replace the recommended multi-day prep courses for the national certification written exams. This training is intended to supplement those training courses and provide a foundation for students who are
preparing for the written exams. Further, this course does not provide any certification of any skills. It is an opportunity for supervisors and students to assess their understanding and comfort level with delivery crane load charts as part of their preparation for the national certification written exams.

At the conclusion of this course, you will be able to:

- Read load rating chart types including main boom, jib charts, 360 and quadrant capacity ratings
- Apply the four base capacity ratings including crane, wire rope, hook and rigging
- Find the boom length, radius and boom angles in the load charts
- Explain split-measurement ratings
- Identify and calculate load-handling deductions
- Solve crane lift solutions using basic math
- Identify key aspects of the QMC and USTC delivery crane load charts
- Solve lifting solution scenarios including determining gross crane capacity; determining net crane capacity; and lifting solutions when load weight is provided (determining max radius placement)

CP3 – Post-Tensioning vs. Prestressing ▲

Friday, Feb. 23 • 10:00 a.m. – Noon
Miroslav Vejvoda, MBA, P.E., Post-Tensioning Institute
Location: CCC, Room 708

This course will focus on post-tensioning and how it relates to precast concrete. It will provide an overview of the different types of post-tensioning, its components and field safety. It will address building and bridge applications. The major steps of installation, stressing, grouting and durability will be discussed.

At the conclusion of this course, you will be able to:

- Define prestressing and why it is used
- Differentiate between unbonded and bonded post-tensioning
- Recognize key installation processes
- Identify key steps of tendon stressing and related safety

CP4 – Precast Concrete Repair: Material and Procedure Selection ■

Friday, Feb. 23 • 10:30 a.m. – Noon
Todd Spindler, Sika Corp.
Location: CCC, Room 703

Precast concrete repair is done every day in a precast plant. This session will focus on procedures and techniques used to make various precast concrete repairs with an emphasis on diagnosis and material selection criteria. We’ll discuss applicable performance standards related to engineering and design, production, shipping, handling, erection, job site condition and environmental issues. You’ll learn how to select proper techniques and procedures and develop a plant-specific repair manual with a general reference guide for repairs.

At the conclusion of this course, you will be able to:

- Identify potential causes that may lead to repairs
- Select repair techniques for precast products
- Implement procedures for handling and documenting repairs

Note: Content in this course is similar to the repair portion of PQS II - Production.

CP5 – Don’t Fear OSHA: What You Can Do to Prevent Violations ●

Saturday, Feb. 24
8:00 a.m. – 9:30 a.m.
Ruben Gallegos, Jensen Precast
Location: CCC, Room 703

When it comes to OSHA compliance, employers can learn a lot by reviewing the violations that OSHA most frequently finds. Knowing the most common violations allows your company to review your operations for similar compliance issues and implement corrective action before OSHA comes calling. The list of most frequently violated standards does not change drastically from year to year. However, the total number of
violations cited, the penalty amounts for those violations and the total number of inspections do change, giving employers insights into how aggressively OSHA is enforcing their standards. This course will look at the most frequent violations and how to prevent them in your plant.

At the conclusion of this course, you will be able to:
- Identify the most frequent OSHA violations
- Implement a prevention plan for violations
- Create a safety culture in your plant to mitigate potential violations

Note: If you attended “Your Precast Plant is Trying to Kill You” at The Precast Show 2017, you may be interested in this session.

CP6 – Troubleshooting Precast Production: Problems and Solutions

Saturday, Feb. 24
8:00 a.m. – 11:00 a.m.
Location: CCC, Room 709/711

There are many components to producing quality precast concrete products. Raw materials, mix design, reinforcing, consolidation and curing all play a part in achieving the final product. This interactive class will provide attendees an opportunity to learn from an expert and from each other. Mel will lead a discussion of best practices and solutions to production issues that precasters deal with every day. Bring your questions to this session, where we’ll address your production issues and discuss how to resolve them.

At the conclusion of this course, you will be able to:
- Identify sources of common precast production challenges
- Troubleshoot quality control issues
- Take at least three new ideas back to your plant to help improve your production process

Note: If you attended “Comprehensive Mix Design” at The Precast Show 2017, you may be interested in this session.

CP7 – Precast Concrete Repair: Architectural Concrete

Saturday, Feb. 24
9:45 a.m. – 11:00 a.m.
Barry Fleck, ALP Supply
Location: CCC, Room 703

When executing a repair on a precast concrete structure, we may be focused on maintaining the durability or the structural integrity of the concrete. We also want to maintain a measure of aesthetic quality, and that is especially important when we are dealing with structures that will remain exposed such as wall panels, sound walls, retaining walls or architectural concrete. How do we perform a repair that will blend in and look like it never happened? This course will focus on procedures and materials used on aesthetic repairs. What do you do if you’re repairing colored concrete? How do you repair a chip or spall on an architectural detail? Useful tips and tricks shared in this course will add another tool to your concrete repair toolbox.

At the conclusion of this course, you will be able to:
- Explain the process of repairing precast concrete made with white cement or colored pigments
- Identify key practices when repairing small details
- Describe materials that are best suited for different types of finishes

Note: If you attended “Precast Concrete Repair” at The Precast Show 2017, you may be interested in this course.
LEADERSHIP & MANAGEMENT

NPCA Precast Show Education (All attendees are invited to register for NPCA Precast Show Education)

CCC = Colorado Convention Center

Strong leaders never stop pursuing greatness, and one of the common traits of great leaders is continued learning. NPCA’s Leadership and Management Track is designed for leaders like you who want to continue to grow and develop. Courses are intended for those who have held senior leadership positions or who aspire to hold these positions in the future and are taught by leadership experts both from within and outside of the precast concrete industry.

Course Level

- Beginner
- Intermediate
- Advanced

LM1 – Advancing Your Management Skills: Interacting Effectively With Your Team

Friday, Feb. 23 • 7:30 a.m. – Noon
Greg Chase, Chase Consulting
Location: CCC, Room 709/711

To be a leader, not simply a manager, we need to not just do things right, but also do the right things. That means finding better ways to carry out the mission of your organization. It is important to understand basic leadership criteria and possess knowledge of best practices when it comes to housekeeping, quality and safety. Learn how to recruit, hire, train and develop employees by communicating effectively, leading by example and celebrating success. Owners, managers, supervisors and those who aspire to hold such positions in the future are encouraged to attend.

At the conclusion of this course, you will be able to:
- Implement effective leadership skills at your precast operation
- Adapt management styles to the diverse workforces in precast plants
- Identify effective methods to improve employee performance
- Communicate effectively with all employees

LM2 – Understanding Profit and Loss Statements and the Part You Play

Friday, Feb. 23 • 8:00 a.m. – 9:30 a.m.
Larry Powell, Gainey’s Concrete Products Inc.
Location: CCC, Room 708

You know that your company profit and loss statement tells you how much last month’s operations paid off – or didn’t – as the case may be. It is important to dive deeper into the traditional P&L to understand your business in ways that will enable you to make better-informed, real-time decisions that impact your day-to-day results. We will explore the P&L statement itself as well as related business metrics and key indicators.

At the conclusion of this course, you will be able to:
- Interpret a traditional P&L and its impact on day-to-day results
- Analyze metrics to make decisions that are beneficial to your company

LM3 – Viewing Suppliers as One of You

Friday, Feb. 23
8:00 a.m. – 10:00 a.m.
Russ Scaffede, Retired VP, Toyota Motor Company
Location: CCC, Room 705

Toyota believes that supplier partnerships are a strategic process of a lean enterprise. In this session, learn how one of the premiere manufacturing companies in the world approaches supplier partnerships as a key to continuous improvement. This strategy treats purchasing relationships and performance relationships as separate events. Toyota has incorporated quality at the source, seeking perfection and embracing scientific thinking into all its supplier partnerships. Russ Scaffede will take you through the supplier/customer relationship and how expectations are clearly established and maintained. Russ will also discuss how the continuous improvement process is value added for both the supplier and customer.

CCC = Colorado Convention Center

ThePrecastShow.org
At the conclusion of this course, you will be able to:
• Analyze suppliers and set the stage for existing and new suppliers
• Handle supplier issues at your plant
• Work with your supplier for cost and quality improvement

LM4 – Winning the War for Talent: Battling the Labor Shortage with Dynamic People Strategy ●
Friday, Feb. 23 • 10:30 a.m. – Noon
Steve Coughran, Coltivar Group
Location: CCC, Room 710/712

The construction industry is experiencing a lingering labor dilemma. As the age of the average worker looms above 45 years old, the construction industry is struggling to replenish its workforce. As the U.S. approaches full employment, this phenomenon is likely to persist. This interactive session will teach key principles including: how to engage employees through meaningful investment, how to enhance employee productivity through training and support, how to effectively integrate technology into company culture to modernize recruiting efforts, and how to foster organizational alignment through defining the strategy of an organization.

At the conclusion of this course, you will be able to:
• Identify methods to create alignment around technology implementation
• Define key areas for improvement within your organizational HR strategies

Note: If you attended “How to Motivate and Retain Employees” at The Precast Show 2017, you may be interested in this session.

LM5 – Managing Suppliers and Contractors ▲
Saturday, Feb. 24
8:00 a.m. – 9:45 a.m.
Greg Roache, Gainey’s Concrete Products Inc.
Location: CCC, Room 704

Managing suppliers and contractors is often a tedious task. Are you currently getting the most out of your partnership with your suppliers? Would you even call it a partnership? How are you vetting your contractors? Greg Roache provides a unique prospective having been a supplier, a precaster and a contractor. This is a great class for both precast producers and suppliers to learn how to strengthen relationships and get the most of your partnerships.

At the conclusion of this course, you will be able to:
• Develop a checklist for vetting and hiring suppliers
• Identify the pitfalls to watch for in reviewing and signing contracts
• Empathize and explain your customer’s point of view

LM6 – Developing the Transformational Leader ▲
Saturday, Feb. 24
8:00 a.m. – 11:00 a.m.
Jeff Patnaude, The Patnaude Group
Location: CCC, Room 707

Executive coaching is a popular process in today’s business world because once a certain level of success is achieved, many executives seek to broaden their scope of excellence by becoming not only better at what they do, but also deepening their understanding of themselves. Developing the Transformational Leader takes the next step and goes deeper into the meaning of personal and professional transformation. Questions such as: “How can the impact of my presence be more effective?” “What legacy will I leave?” and “Is there a way to balance work life and home life?” are addressed through a four-question process of who, why, how and what. In a process that includes a 360 assessment, feedback, goal setting and execution, participants can move from making more than a living to making more of a difference.

At the conclusion of this course, you will be able to:
• Discover strengths and developmental areas of emotional intelligence
• Plan your own SMART value-based behavioral change
• Explore psychological type for understanding self and others
• Convert your job into purposeful work
• Enhance your most noticeable skills – public speaking
LM7 – Interns: Hiring Tomorrow’s Best Today

Saturday, Feb. 24  
9:45 a.m. – 11:00 a.m.
Panel Discussion  
Location: CCC, Room 702

As the construction industry continues to expand, the need for qualified personnel is becoming more urgent. During the past decade, a lot of talent has left the precast industry due to downsizing and attrition. Today, more and more companies are facing an aging employee population. The need for succession planning and increasing human capacity is becoming more urgent. Internships provide an ideal way to attract high-quality students to the precast industry. Internships provide both employers and students the chance to learn about each other before making a long-term commitment. They also enable employers to train young professionals on how the precast concrete industry works. Even if an intern ultimately works for a specifier, the knowledge gained about precast concrete can have a lasting influence. Join us for a panel discussion on the importance of internship programs and explore the key benefits for both employers and interns. Participants will receive a template of a proven internship model which can be easily adopted by an employer, regardless of the size of the company.

Special thanks to the NPCA Foundation and PCI Foundation for their financial support of the development of the internship program template that is a free member resource for NPCA and PCI members.

At the conclusion of this course, you will be able to:

• Recognize the importance of an internship program for your organization and the precast industry
• Use resources and contacts to establish an internship program in your company
• Implement a customizable internship model at your facility, whether you are a producer or a supplier

Note: If you attended the “NPCA Manufacturing Extension Partnership (MEP)” webinar in 2017, you may be interested in this course.

MARKETING & SALES

NPCA Precast Show Education (All attendees are invited to register for NPCA Precast Show Education)

CCC = Colorado Convention Center

The Marketing and Sales Track is geared toward business owners, senior managers, CFOs, marketing personnel and those who aspire to hold such positions. Expert instructors in marketing and sales will provide the latest in philosophy and techniques. These courses will offer the opportunity to network with fellow managers and owners to discuss common challenges.

Course Level  Beginner  Intermediate  Advanced

MS1 – Five Principles to Consistent Sales Success

Friday, Feb. 23  •  8:00 a.m. – 10:00 a.m.  
Dave Fellman, Dave Fellman & Associates  
Location: CCC, Room 704

Whether it’s your full-time job or just one of the many hats you wear as an owner or manager, you are a salesperson. So the question is, are you really functioning at your best in that role every day? It’s easy to get sidetracked and to develop bad habits and attitudes. It’s not always easy to maintain your enthusiasm and your commitment to growing your business. Dave Fellman is a thought-leader in both management and sales strategies. In this fast-moving session, he will help you to rethink and reinvigorate your sales strategy and practices.

Note: If you attended “HUMANagement” at The Precast Show 2017, you may be interested in this course.
At the conclusion of this course, you will be able to:
• Display a business-building attitude
• Be all about customer service and customer maximization
• Discover that sales is not just about price
• Recognize that time really is money and pay attention to how you’re spending it
• Identify a bad customer and do something about it

Note: If you attended “Rethinking Sales Management” at The Precast Show 2017, you may be interested in this course.

MS2 – Sales and Marketing: A Roadmap to Success

Friday, Feb. 23 • 10:30 a.m. – Noon
Brian Miller, P.E., MBA, LEED AP, GCP Applied Technologies
Location: CCC, Room 704

What does marketing and sales mean to you? If you think marketing is making brochures and sales does everything else, then this is definitely a session you should attend. Marketing and sales can be very powerful when working together like a finely tuned instrument. They both have unique and important roles in any business, including precast. This course will discuss the roles of both marketing and sales, how they are different and how they can work together. Several key concepts will be discussed such as market research, branding, segmentation, messaging, promotion, lead generation, relationship selling and more – all of which can be used in your business to grow and be more profitable. We will discuss these in textbook terms, but we will also discuss some of the challenges we face today and how to apply these marketing and sales techniques in the precast industry.

At the conclusion of this course, you will be able to:
• Explain the difference between marketing and sales
• Define what a brand truly is
• Describe how to use sales and marketing together in the precast industry to grow your business

Note: If you attended the “NPCA Sales and Marketing Alignment” webinar in 2017, you may be interested in this course.

MS3 – Five Steps to Build a Successful Digital Marketing Roadmap

Saturday, Feb. 24
10:00 a.m. – 11:00 a.m.
Dan Konstantinovsky, RH Blake
Location: CCC, Room 704

According to Google, 71% of business-to-business web searches begin with a nonspecific search – no mention of brand or company name. And, nearly 60% of the industrial buying journey occurs without contacting the supplier. Find out how you can leverage digital marketing and website best practices to help you drive and convert leads and grow your business. You’ll be able to identify how your customer’s buying process has changed to better align your marketing efforts.

At the conclusion of this course, you will be able to:
• Recognize digital and inbound marketing fundamentals
• Better align your marketing to your customer’s buying process
• Implement best practices for optimizing your website for search engines and lead generation

Note: If you attended “How to Outsell Your Competition” at The Precast Show 2017, you may be interested in this course.

<td>QC1 – Lean Six Sigma for Precast: Driving Decisions with Data</td>
<td>![Bullet] Discover how Six Sigma methods have saved consumers billions of dollars&lt;br&gt;![Bullet] Recognize that you can’t get where you’re going until you know where you’ve been</td>
<td>![Bullet] Identify the main causes of bug holes associated with different types of concrete&lt;br&gt;![Bullet] Describe methods to avoid discoloration and shadowing of reinforcing&lt;br&gt;![Bullet] Explain appropriate repair methods for different degrees of imperfections</td>
<td>Attendees are encouraged to bring their questions and experiences to share and learn. At the conclusion of this course, you will be able to: ![Bullet] Define lean manufacturing as a living principle&lt;br&gt;![Bullet] Use data and records to your advantage</td>
</tr>
</tbody>
</table>
seen a course on what to do when our concrete is at rest? After placing and vibrating concrete a lot of steps get lost, which leads to poor finishes and additional work. This course will help you identify best practices for allowing concrete to rest and creating the most desirable environments for finishing your products. The course will then dive into best practices for curing, including how environmental factors can play a huge role in appearance and curing time. We will also touch on the best practices for steam curing and using chemical accelerators for curing.

At the conclusion of this course, you will be able to:
• Recall best practices for letting concrete rest
• Identify the top negative practices we do every day
• Recognize how environmental conditions play a big role in resting concrete
• Discuss pros and cons of chemical acceleration and steam curing

QC4 – Keeping the Bad Out of Your Good Concrete ▲
Friday, Feb. 23 • 10:30 a.m. – Noon
Mohammed Albahttiti, Ph.D., California State University, Chico
Location: CCC, Room 705

Precast concrete is known for its durability. However, enemies are lurking. Destructive agents are looking for ways to get into concrete and wreak havoc. Fear not, as there are ways to thwart their efforts. This course will examine how potentially damaging substances can get into precast concrete and affect its durability. Different transport mechanisms will be explained. Attendees will discuss specific mechanisms such as carbonation, freeze/thaw, chloride, sulfate and acid attacks and how they work to weaken concrete. We will also focus on what you can do to make your concrete more impermeable and retain its durability. Also included is discussion on other preventative measures such as additives and admixtures.

At the conclusion of this course, you will be able to:
• Explain common transport mechanisms of substances into concrete
• Describe the process of freeze/thaw damage
• Identify important practices that contribute to concrete impermeability

QC5 – Managing Air in Concrete ■
Saturday, Feb. 24
8:00 a.m. – 9:30 a.m.
G. Terry Harris, FACI, GCP Applied Technologies
Location: CCC, Room 702

If you have spent any time in a concrete plant, chances are you have either encountered or heard from someone who has dealt with entrained air issues in concrete. We use the term “chasing air” to describe the process of troubleshooting air issues. That is an apt description because we are often adjusting the air entrainment dosage and then testing to determine if we have achieved an acceptable level. In this course, we will discuss how to get air, why air is necessary and how to effectively manage air in your concrete.

At the conclusion of this course, you will be able to:
• Recall how to entrain air
• Discover reasons why air is necessary in concrete
• Recognize factors that impact air in concrete
• Produce concrete with consistent air entrainment

QC6 – Water You Doing to Keep Your Water-Cement Ratios in Check? ●
Saturday, Feb. 24
8:00 a.m. – 9:30 a.m.
Kayla Hanson, NPCA
Location: CCC, Room 705

Water plays a pivotal role in concrete strength, quality and durability, so it is imperative to get it right – every single time. However, water and moisture come from other sources besides what is intentionally batched into the mixer. In this course, we will investigate what those other sources of water and moisture are and why they matter. We will also review the ways in which water-to-cement ratio affects fresh and hardened concrete, identify signs of water-related issues in your mix and discuss steps you can take in your plant to help prevent the occurrence of water or moisture issues.
At the conclusion of this course, you will be able to:

• Explain the role and impact of water and different water-cement ratios on fresh and hardened concrete properties
• Identify the various sources of water in concrete from material procurement to production, curing and beyond
• Identify signs of water issues in fresh and hardened concrete and how to troubleshoot

QC7 – Creating Effective, Easy-to-Read Shop Drawings ▲

Saturday, Feb. 24
8:30 a.m. – 10:30 a.m.
Cyndi Glascock, Gainey’s Concrete Products Inc.
Claude Goguen, P.E., LEED AP, NPCA
Location: CCC, Room 708

Taking information from a set of drawings and converting that to a plant shop drawing has a significant influence on quality assurance. We focus on making sure the take-off is done correctly and the information on the shop drawing is accurate. But how easy is it to read? Every assumption a plant employee has to make increases the chance of error. Every question the employee has to ask affects production. This is why the clarity of a plant shop drawing is so important. This course will focus on best practices when creating plant shop drawings. An overview of CAD-based drawings will be presented as well as useful tips and tricks when using this software. Other software options will be discussed. Presenters will share ideas on minor adjustments to shop drawings that can lead to major enhancements in communication.

At the conclusion of this course, you will be able to:

• Identify common issues with shop drawings that can lead to confusion and error on the plant floor
• Demonstrate effective ways to work with shop drawing scales, dimensions and perspectives
• Describe three ways to enhance shop drawings when using CAD software

Note: If you attended “Shop Drawings Workshop” at The Precast Show 2017, you may be interested in this course.

QC8 – Product Handling in the Yard ●

Saturday, Feb. 24
9:45 a.m. – 11:00 a.m.
Mitch Rector, NPCA
Location: CCC, Room 705

You have produced a quality precast product by following proper quality control procedures and thorough recordkeeping. But the job is only halfway finished. If you don’t properly store, load and transport it to the job site, you run the risk of damaging that product. Improper use of dunnage and improper stacking procedures can lead to product defects that could affect the aesthetics and potentially affect the structural integrity of the product itself. Improper loading and transporting can also damage your products. This course will detail best practices in storage methods for specific precast pieces. We will also discuss how to safely load, secure and transport the product to the job site for installation.

At the conclusion of this course, you will be able to:

• Design your yard and storage procedures to minimize damage to products
• Properly load and secure precast products for delivery
• Thoroughly inspect delivery equipment to ensure product is delivered safely and undamaged

Education Program Policy

Educational sessions are noncommercial forums. Speakers are expected to refrain from using brand names and endorsing specific products. Educational sessions are not to be used for direct promotion of a speaker’s product, service or monetary self-interest. Speakers at all sessions must refrain from overt statements, harsh language or pointed humor that harms the rightful dignity and social equity of any individual or group. Please note any violation of this policy on session evaluation forms or let any NPCA staff member know.
SPONSORED EDUCATION
HR = Hyatt Regency Denver

TITAN – Titan II Power User

Wednesday, Feb. 21
3:00 p.m. – 5:30 p.m.
$125 Full Package Member
$185 Trade Show Only Member
$145 Full Package Nonmember
$225 Trade Show Only Nonmember
Location: HR, Level 4, Capitol 4,

Created for sales representatives, accounts receivable personnel and estimators/engineers, this session is geared toward enlightenment of new features and possibilities within the Titan II system. The course will debut the New! Contractor’s HUB, which is a web-based program that will allow your customers to access information about their jobs’ statuses, invoices, scheduling, dispatch and more. We will also discuss more robust features in the Visual Takeoff Manager and all New! Enhanced Drawing options along with covering New! Invoicing options and invoice posting features.

Hot topics include:
• New! Contractor’s Hub – Customer Portal
• New! More Robust Visual Takeoff Manager
• New! Enhanced Drawing Options
• Individual Invoice Posting Feature
• Submarks Quoting using Visual Estimator
• Versioning the Quotes
• Screen Field Options
• New! Dispatch Popup Screen
• Product Pictures and Insert Drawings
• New! Architectural Scheduling Features
  o Form Sequencing and Scheduling
  o Anticipation dates by section
  o Anticipation date viewer by Mark Number
  o Anticipation BOM reports
• Structure Batch Releasing
• Full Structure Invoicing
• New! Mark Number Reports
• New! VE BOM Loading Features
With the inaugural class meeting at The Precast Show 2017 in Cleveland, Leadership NPCA brought together its first class of 12 students for advanced management training, networking and industry association opportunities in a one-year intensive program. The first class is set to complete its yearlong journey with a wrap-up session at The Precast Show 2018 in Denver. The class will graduate during the NPCA Keynote Luncheon on Thursday, Feb. 22. Congratulations graduates!

The second Leadership NPCA class kicks off at The Precast Show 2018. The course is limited to 12 students each year who are chosen from applications submitted to the NPCA Education Committee. The kickoff will be an opportunity for the new class to meet with the instructor and learn more about what to expect for the next 12 months. Please visit precast.org/n pca-leadership-academy for more information.
As the construction industry continues to evolve, contractors and project owners are seeking partners that can meet their growing demands for quality products delivered on tight schedules at competitive prices. Whether it is a major transportation project, a municipal infrastructure restoration or a septic tank delivered to a backyard, quality, reliability and accountability are more important than ever. The future will include steeper challenges and more opportunities for precast concrete producers and it is our mission to position precasters for success.

With new processes that save time, save labor and reduce waste, precasters are well positioned to provide the best solutions, but that’s only part of the story. Running a profitable business in the precast concrete industry is more difficult than ever. The landscape is always changing, with new regulations, advancements in technology, infrastructure funding and skilled labor shortages all impacting your business. When you’re spending most of the workday manufacturing great precast products, it’s a challenge to keep up with the ever-changing environment. The good news is, you’ve got a partner in NPCA. From technical information to marketing tools, safety services and top-notch training, we’re working every day to provide you with wide-ranging resources that help you meet everyday challenges in a highly competitive industry.

NPCA members benefit from a vast range of products and services and unique opportunities. We provide precast-specific education, networking opportunities, a nationally recognized certification program, award-winning publications and other tools for the modern precast concrete business. Major initiatives for 2018 include expanded outreach to the specifying community and increased emphasis on online and in-person education through precast-specific courses and webinars. It’s all part of our ongoing mission to make precast concrete the go-to material for infrastructure restoration and innovative, resilient building techniques.

NPCA’S SERVICES ARE BROKEN DOWN INTO FIVE MAIN AREAS:
- Technical
- Educational
- Meetings
- Outreach
- Membership

Stop by the NPCA exhibit booth on the trade show floor to find out more!

TECHNICAL SERVICES

NPCA members with technical questions or issues can rely on the NPCA Technical Services team for up-to-date support on the best practices in quality precast concrete production.
RESOURCES INCLUDE:
• NPCA’s ANSI-accredited Plant Certification Program
• NPCA Quality Control Manual for Precast Concrete Plants
• Customizable NPCA Guide to Plant Safety
• New safety video
• Customizable OSHA silica exposure control plan
• NPCA Annual Book of Selected ASTM Standards
• Technical publications
• Industry representation on many codes and standards committees
• NPCA product committees

EDUCATIONAL SERVICES
In an industry where margins are tight, new hires are hard to find and competition is tough, a well-trained workforce can mean the difference between the success or failure of a business. That’s why NPCA counts technical education as one of its most important services. Available to members and nonmembers, NPCA's educational courses keep precasters on the leading edge of new technology while providing a firm foundation of quality production techniques. Employer-provided training and the opportunity to advance in the plant through certifications such as the Master Precaster designation help create a skilled and stable staff that pays dividends in better quality, more efficiency, a safer workplace and lower turnover.

RESOURCES INCLUDE:
• Production & Quality Schools (PQS) through Precast University
• The Master Precaster certification series
• Leadership NPCA executive training
• Online education
• The NPCA webinar series and webinar library
• Precast Learning Lab videos
• Specifier webinar series
• OSHA crane operator certification resources
• Lunch and learns

MEETINGS
Look for these upcoming NPCA meetings:
• NPCA 53rd Annual Convention, Oct. 4-6, 2018, Providence, RI
• The Precast Show 2019, Feb. 28- March 2, Louisville, KY

COMMUNICATION & OUTREACH
NPCA continuously develops new tools to educate and engage engineers, architects and regulators about the many benefits of specifying precast concrete. The NPCA outreach initiative generated more than 9 million impressions in 2017 for the second year in a row and led to more than 150,000 clicks to the precast.org website. The outreach effort will expand even more in 2018 with a greater focus on direct contact with the specifying community through increased presence at trade shows, additional presentations and lunch and learn sessions with specifiers and even greater participation in codes and standards bodies.

RESOURCES INCLUDE:
• NPCA Industry Benchmarking Report
• Exclusive member content at precast.org
• Precast Inc. magazine
• Precast Solutions magazine
• Precast Express and other special interest e-newsletters
• Membership Directory & Buyer's Guide
• Little Books of Concrete
• Government affairs
• NPCA Shop
• precast.org

MEMBERSHIP
The Member Services department is your first point of contact at NPCA when you have questions or would like to speak with any of the staff.

RESOURCES INCLUDE:
• Find a Producer/Find an Associate search at precast.org
• Many networking opportunities
• Trade show, annual convention and other events
• Awards and recognition programs
• Educational courses and technical training
• Access to NPCA's technical team
• Publications – both print and online
• Leadership development

8:00 a.m. – 5:00 p.m.  
CCC, Room 705/707

**PQS Level III-Leadership (Day 1)**  
8:00 a.m. – 5:00 p.m.  
CCC, Room 704/706

**Executive Committee Meeting**  
(Invitation only)  
2:00 p.m. – 5:00 p.m.  
HR, Level 3, Agate

**NPCA Board of Directors Dinner**  
(Invitation only)  
6:00 p.m. – 8:00 p.m.  
HR, Level 3, Mineral Foyer

**WEDNESDAY, FEB. 21**

**Continental Breakfast**  
6:30 a.m. – 9:30 a.m.  
HR, Level 3, Mineral Hall Foyer

**Education Committee**  
7:00 a.m. – 8:30 a.m.  
HR, Level 3, Mineral Hall D

**Manhole Product Committee**  
7:00 a.m. – 8:30 a.m.  
HR, Level 3, Mineral Hall E

**Sustainability Committee**  
7:00 a.m. – 8:30 a.m.  
HR, Level 3, Mineral Hall F

**Utility Structures Product Committee**  
7:00 a.m. – 8:30 a.m.  
HR, Level 3, Mineral Hall B

**Wall Product Committee**  
7:00 a.m. – 8:30 a.m.  
HR, Level 3, Mineral Hall C

**Board of Directors Huddle**  
8:30 a.m. – 9:30 a.m.  
HR, Level 3, Granite A

**PQS Level I (Day 2)**  
9:00 a.m. – 5:00 p.m.  
CCC, Room 703

**PQS Level II-Production (Day 2)**  
9:00 a.m. – 5:00 p.m.  
CCC, 705/707

**PQS Level III-Leadership (Day 2)**  
9:00 a.m. – 5:00 p.m.  
CCC, 704/706

**Leadership NPCA and Leadership PCI Wrap-up and Networking**  
(Invitation only)  
9:30 a.m. – 10:30 a.m.  
HR, Level 3, Mineral Hall G

**MIC Task Force**  
9:30 a.m. – 11:00 a.m.  
HR, Level 3, Mineral Hall E

**Precast Concrete Paving Slabs Product Committee**  
9:30 a.m. - 11:00 a.m.  
HR, Level 3, Mineral Hall C

**Crane Task Force**  
11:15 a.m. – 12:15 p.m.  
HR, Level 4, Marble

**Joint Board Luncheon**  
(Invitation only)  
11:30 a.m. – 1:00 p.m.  
HR, Level 3, Agate

**Safety, Health and Environmental Subcommittee**  
1:30 p.m. – 3:00 p.m.  
HR, Level 3, Mineral Hall C

**Technical Committee**  
1:30 p.m. – 3:00 p.m.  
HR, Level 3, Mineral Hall E

**Water and Wastewater Product Committee**  
1:30 p.m. – 3:00 p.m.  
HR, Level 3, Mineral Hall B

**Titan II Power User**  
3:00 p.m. – 5:30 p.m.  
HR, Level 4, Capitol 4

**Leadership NPCA Kickoff**  
(Invitation only)  
3:00 p.m. – 6:00 p.m.  
HR, Level 4, Capitol 3

**Grease Interceptor Task Force**  
3:30 p.m. – 5:00 p.m.  
HR, Level 3, Mineral Hall F

**Quality Assurance Committee**  
3:30 p.m. – 5:00 p.m.  
HR, Level 3, Mineral Hall E

**Safety, Health and Environmental Committee**  
3:30 p.m. – 5:00 p.m.  
HR, Level 3, Mineral Hall C

**Stormwater Management Product Committee**  
3:30 p.m. – 5:00 p.m.  
HR, Level 3, Mineral Hall B

**NPCA Foundation Board Meeting and Reception**  
5:30 p.m. – 7:00 p.m.  
HR, Level 3, Agate

**THURSDAY, FEB. 22**

**The Precast Show Plant Tour**  
6:30 a.m. – 11:15 a.m.  
Meet in the HR lobby at the time listed on your ticket

**The Precast Show Optional Tour: Discover Denver City Tour**  
9:00 a.m. – 11:15 a.m.  
Meet in the HR lobby at 8:45 a.m.

**Keynote Luncheon Featuring Industry Awards & Graduations**  
11:30 a.m. – 1:30 p.m.  
CCC, Four Seasons Ballroom

**THE PRECAST SHOW GRAND OPENING**  
2:00 p.m. – 7:00 p.m.  
Welcome Reception on Trade Show Floor  
4:00 p.m. – 7:00 p.m.  
(Open to all registered attendees. Includes hors d’oeuvres and host bar)

**Women in Precast Reception**  
7:00 p.m. – 8:30 p.m.  
HR, Level 4, Capitol Foyer

**FRIDAY, FEB. 23**

**Education Continental Breakfast**  
7:30 a.m. – 9:30 a.m.  
CCC, Lobby C

**Advancing Your Management Skills: Interacting Effectively with Your Team (LM1)**  
7:30 a.m. – Noon  
CCC, 709/711

**Lean Six Sigma for Precast: Driving Decisions With Data (QC1)**  
8:00 a.m. – 9:30 a.m.  
CCC, Room 707
**Troubleshooting Precast Production: Problems and Solutions (CP6)**
8:00 a.m. – 11:00 a.m.
CCC, Room 709/711

**Developing the Transformational Leader (LM6)**
8:00 a.m. – 11:00 a.m.
CCC, Room 707

**Outreach Task Force**
8:30 a.m. – 10:00 a.m.
CCC, Room 601

**Creating Effective Easy-to-Read Shop Drawings (QC7)**
8:30 a.m. – 10:30 a.m.
CCC, Room 708

**Precast Concrete Repair: Architectural Concrete (CP7)**
9:45 a.m. – 11:00 a.m.
CCC, Room 703

**Interns: Hiring Tomorrow's Best Today (LM7)**
9:45 a.m. – 11:00 a.m.
CCC, Room 702

**Product Handling in the Yard (QC8)**
9:45 a.m. – 11:00 a.m.
CCC, Room 705

**Five Steps to Build a Successful Digital Marketing Roadmap (MS3)**
10:00 a.m. – 11:00 a.m.
CCC, Room 704

---

**THE PRECAST SHOW**

11:00 a.m. - 5:00 p.m.
Buffet Lunch on the Trade Show Floor
Noon - 1:30 p.m. (Open to all registered attendees.)
CCC, Halls C&D

---

**INDUSTRY UPDATES ON THE TRADE SHOW FLOOR**
1:30 p.m. - 2:30 p.m.
CCC, Halls C&D (Booth #240)

**NPCA Foundation Student and Professor Networking Event**
3:00 p.m. – 4:00 p.m.
CCC, Upper Lobby D

**NPCA Affiliates’ Roundtable**
(Invitation only)
5:00 p.m. – 6:00 p.m.
HR, Level 3, Mineral Foyer

**Master Precaster Alumni Bash 2018**
(Invitation only)
6:00 p.m. – 8:00 p.m.
Meet in the HR Lobby at 5:45 p.m.

---

**SATURDAY, FEB. 24**

**Education Continental Breakfast**
7:30 a.m. – 9:30 a.m.
CCC, Lobby C

**NPCA-PCI Joint Marketing Task Force**
8:00 a.m. – 8:30 a.m.
CCC, Room 602

**Don’t Fear OSHA: What You Can Do to Prevent Violations (CP5)**
8:00 a.m. – 9:30 a.m.
CCC, Room 703

**Managing Air in Concrete (QC5)**
8:00 a.m. – 9:30 a.m.
CCC, Room 702

**Water You Doing to Keep Your Water-to-Cement Ratios in Check? (QC6)**
8:00 a.m. – 9:30 a.m.
CCC, Room 705

---

**THE PRECAST SHOW**

10:00 a.m. - 1:00 p.m.
Brunch on the Trade Show Floor
11:00 a.m. - Noon (Open to all registered attendees. Includes bloody marys and mimosas)
CCC, Halls C&D

---

**Yoakum Award Committee**
3:30 p.m. – 4:30 p.m.
HR, Level 4, Marble

**Precast Postgame Experience at Mile High Stadium**
Annual Industry Extravaganza and Networking Event
6:30 p.m. – 10:00 p.m.
Meet in the HR lobby at the time listed on your ticket

---

**SUNDAY, FEB. 25**

**NPCA Board of Directors Meeting with Breakfast**
8:00 a.m. – Noon
HR, Level 3, Agate
This photo- and schematic-rich manual offers comprehensive information on precast concrete pavement, including:

- Design of jointed precast concrete pavement
- Shop drawing preparation
- Fabrication
- Installation details
- Project execution
- Maintenance of completed installations

Precast Concrete Environmental Product Declarations (EPDs)

The Canadian Precast/Prestressed Concrete Institute (CPCI), the National Precast Concrete Association (NPACA) and the Precast/Prestressed Concrete Institute (PCI) have released Environmental Product Declarations (EPDs) in three key precast concrete product categories. The EPDs will allow architects, engineers, building owners, and other specifiers to better understand the environmental impacts of precast and prestressed concrete products.

An EPD is an ISO-compliant and third-party verified, standardized and internationally recognized comprehensive tool for providing information on a product’s environmental impact.

The precast concrete industry wide EPDs are now available for Architectural and Insulated Wall Panels, Structural Precast Concrete Products and Underground Precast Concrete Products.

Download the precast concrete EPDs: www.sustainableprecast.ca | precast.org | pci.org

CPCI is proud to partner with NPCA and PCI on The Precast Show and these two North American industry sustainability initiatives:

ENVIRONMENTAL PRODUCT DECLARATIONS FOR PRECAST CONCRETE
NORTH AMERICAN PRECAST CONCRETE SUSTAINABLE PLANT PROGRAM
CAST STONE INSTITUTE®

Who is The Cast Stone Institute?
The Cast Stone Institute was formed in 1927 by a group of visionary Cast Stone Producers who identified the need to have a common voice for the industry. Today our mission remains as the authoritative spokesperson for cast stone and to provide expert counsel to the architectural and engineering communities.

Certified Producer Members of the Cast Stone Institute are engaged in the relentless pursuit of excellence in manufacturing. Prior to admission, each potential producer member must submit to a rigorous examination of product quality, safety, testing and meticulous record keeping. They must also undergo the recertification process every two years. The results of this association of producers and suppliers to the cast stone industry include consistently high product quality, through continuous improvement in manufacturing methods and materials, and the assurance that Cast Stone Institute Certified Member Plants are “on the job” keeping cast stone a premier building material. The Cast Stone Institute, through its standing committees disseminates current information and standards regarding the design, manufacturing, installation and use of cast stone.

What is Cast Stone?
Cast stone is a premier masonry product that provides ornamental or functional features to buildings and other structures. It is made from fine and coarse aggregates, Portland cement, mineral oxide color pigments, chemical admixtures and water. Not surprising then, cast stone products are available in virtually any color, and will give the appearance of a variety of natural building stones including but not limited to limestone, granite, slate, travertine or marble. Applications for cast stone range from the simplest windowsills to the most complicated architectural elements.

Properly manufactured, cast stone has the same or stronger physical properties as most dimensional building stone. Properly selected and installed, cast stone can result in an architectural project of enduring beauty to be enjoyed for decades. Core and installation of cast stone are referenced in many of the Cast Stone Institute publications and Technical Bulletins available on our website, www.caststone.org.
ARCHITECTURAL CAST STONE – STANDARDS FOR DESIGN, FABRICATION AND INSTALLATION

Friday, February 23 • 10:00 AM - 11:00 AM • Located in Room 601

PRESENTER: Craig Lyon, Cast Stone Institute®

PROGRAM #: CSI107 | LENGTH: 1 HOUR | CREDITS: 1 AIA/CES LU/HSW

COURSE DESCRIPTION
Attendees will be informed of new reference standards for architectural cast stone developed by The Masonry Society (TMS 404/504/604) for design, fabrication and installation. The development process and how these standards are to be implemented for the designer will be discussed. The responsibilities of the fabricator and installer will also be reviewed.

LEARNING OBJECTIVES
Attendees will:
• Gain knowledge about new standards for architectural cast stone, how they were developed and where they are referenced.
• Learn the different other specification documents and technical resources available
• Understand the design requirements for architectural cast stone.
• Understand the requirements for fabrication and installation as they relate to design of architectural cast stone.

NEW!
Be sure to grab a 2018 NPCA Webinar pocket guide to see a list of various courses with descriptions.

- Complete list of NPCA Webinars for 2018
- Special pricing for Webinar tracks in Production and Safety, Technical Training and Quality Control
- Purchase the 2018 Webinar Package and receive access to NPCA’s entire library of webinars with dozens of training topics in Production, Technical, Quality Control, Safety, Human Resources, Marketing and Sales
- Check out our extensive listing of webinars in the Online Learning Center

You Need a Silica Exposure Plan

Manufacturers in the United State must have an exposure control plan in place by June 23, 2018, to meet the new OSHA air contaminant standard.

We Have It!

The Occupational Health Program & Written Exposure Control Plan for Respirable Crystalline Silica provides a step-by-step guide for understanding the OSHA rule, and creating and documenting a plan to protect your workers and maintain compliance.

Jointly published by the Precast/Prestressed Concrete Institute and the National Precast Concrete Association

Free Download for NPCA & PCI Members • Nonmember Price: $499

Visit the online bookstores at precast.org and pci.org to download your manual

When the right people partner side by side for the right solution...

...that’s Chemistry At Work.

Every job is an opportunity to build something that lasts, and that includes your business. That’s why you not only need the right products to get the job done, but someone you trust to get it done right. We infuse chemistry into every aspect of what we do, from the products we develop in the lab, to how we work with you on the job, to helping you plan ahead and move your business forward.

EdenCrete® is a carbon nanotube enriched liquid additive which increases the strength, durability and ductility of concrete. Improvements provided to concrete include compressive, split-tensile and flexural strength, as well as abrasion resistance, shrinkage and permeability. EdenCrete® is a single admixture which enhances several properties of concrete and can help reach design strengths sooner.

Superior Quality

Efficient, strong, reliable

Haarup are specialists in designing, manufacturing, and installing efficient concrete batching and mixing plants.

Haarup manufactures all their equipment in their own factory in Denmark including individual mixers, skip hoists, aggregate batching and weighing systems, concrete traveling buckets and their own control systems.

Haarup’s vast project experience and wide range of reliable equipment make it easy for you to either modernize existing plants or install new ones.

Reliable equipment characterizes all Haarup plants – irrespective of size.

Haarup mixers guarantee you an unmatched quality and a unique 8-year Warranty on the mixer pan and gearbox.

FiberWorx Fibers help improve the quality and performance of Precast Structures. How...? FiberWorx collaborates with Precast companies and industry design professionals, to help engineer consistent, quality enhancing, reinforcing improvements into precast products. FiberWorx Solutions augment the Product’s performance characteristics; adding flexural resistance to internal and external forces [not available with traditional steel reinforcement] thus extending the Product’s value and life-cycle. These same Solutions drive real costs out of the entire production process!

Precise Forms All-Aluminum Precast Riser Form

* Reduce Labor Cost
* Reduce Lumber Cost
* Improve Casting Quality
* Reduce Lumber Degradation

The Precise Riser Form is designed to create castings of non-standard heights. It replaces lumber blocking with a quicker and more cost effective method.

Pallet Forms placed on Riser Forms.

The Precise Riser Form

Founded in 1965, NPCA has grown to become an international trade association representing 900 companies and suppliers that manufacture hundreds of precast, prestressed and reinforced concrete pipe products for underground and above-ground applications. NPCA member companies manufacture products that create and rebuild infrastructure, protect the environment and offer modularity, customization and infinite creative design possibilities across all sectors of the construction industry. NPCA provides members with the latest technical and industry information through a host of publications, educational seminars, product committees and conferences. The association promotes high quality standards and safety through its education component and its plant certification program, which is accredited by the American National Standards Institute.

US Foundry

Providing quality products and excellent service to customers since 1916.

To meet all of your casting needs, US Foundry has a complete product line including:
- Manhole Rings & Covers
- Cast Iron & Steel Grating
- Municipal & Utility Castings
- Inlet Frames & Grates
- Trench Grating
- Tree Grates
- Valve Boxes
- Airport Products
- Hatches
- Aluminum & Steel Fabrication

Quality Takes Shape in the Form
Before the first piece is cast, a form is designed and built. It’s here — inside well-built, dimensionally accurate, durable forms — that precast integrity, intrinsic value and quality are born.

For 50 years, precast producers have trusted Hamilton Form, more than any other supplier, with their forming needs. Our signature blue forms help maximize production efficiencies, deliver outstanding results and have come to symbolize the precaster’s commitment to quality.

From the simple to the complex, no matter what the scope of your next project, call on Hamilton Form to deliver. Contact us at 817 590-2111 or sales@hamiltonform.com

Hamilton Form Company, Ltd.
7009 Midway Road • Fort Worth, Texas 76118
Custom forms. Custom equipment. Practical solutions.
