WORKING SAFELY IN A PRECAST YARD

Wear your required Personal Protective Equipment (PPE)

Don't run, walk
Be alert and aware of your
surroundings.
Look for moving equipment.

SPEED LIMIT 5

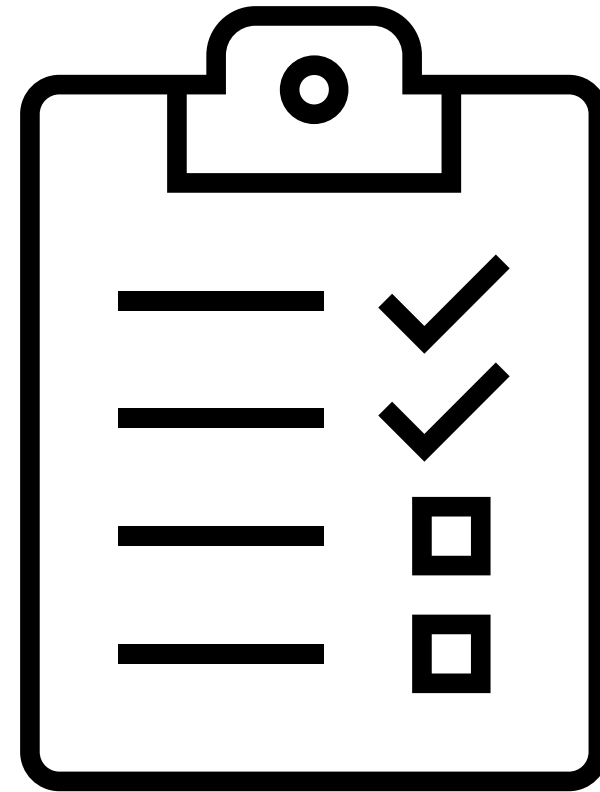

**Obey all traffic signs
and follow the
posted speed limit.
Stop completely,
look both directions
and proceed with
caution when clear.**

If you work on flat bed trailers, always be aware of your footing. Make sure to look before you step. You have the potential of falling off the trailer if you are not looking where you step.

Plan your work in advance to prevent injuries while handling materials and working with equipment.

Keep your work areas and roads orderly and clean. This helps minimize slips, trips and falls.

Inspect ALL your equipment before each use. Make sure everything is in good repair and if it's not, put it out of service and report it.
