Precast Days 2020
Member FAQ

What is Precast Days?
Precast Days is an industry wide event where NPCA members are encouraged to host open houses at their facilities to promote the versatility and quality that goes into precast concrete.

When is Precast Days?
NPCA is encouraging members to host their open houses between October 19-November 6, 2020. However, plants are welcome to hold their open houses on the date best suited for their schedules.

Who are the attendees?
Engineers, specifiers, state and city officials, contractors, students, faculty, and any other interested parties. Precast Days is a great opportunity to invite the community into your facility to share what your company does. In addition to promoting precast concrete as the material of choice, your open house can also be a recruiting tool for hiring new employees.

How will Precast Days be promoted?
NPCA will fund promotion in a variety of national publications and websites such as C + S Engineer magazine, AGC, Public Works, etc. These ads will link to NPCA’s Precast Days website where attendees can select the plant they want to visit and register for the event. NPCA will then provide registration lists to the plants.

How does my company sign up to participate?
To sign up your plant please contact Ashley Benson at abenson@precast.org or (800) 366-7731. You will be asked to complete the plant commitment form. This information will be included on the registration site.

Are there any costs to participate?
There is no fee to participate in Precast Days. Please note that your plant will be responsible for any costs associated with your individual open house. This may include providing PPE to attendees, food and beverage, local marketing of the event, A/V, etc.

How will attendee registration be handled?
Attendees will register for Precast Days via NPCA’s website. There is no registration fee for attendees.

Are Precast Days open to Producer and Associate members?
Yes! Both producer and associate members are encouraged to open their plants for Precast Days.

Does my plant need additional insurance coverage for Precast Days?
Please check with your insurance provider to determine if any additional insurance is required for your open house and what PPE should be provided to attendees.
