The Precast Show® App
Your Trade Show Partner

It's everything you need to know about The Precast Show 2022 – in your pocket or on your tablet. Download the mobile app, and you'll have all the trade show details at your fingertips. Find the products you want to see, navigate the show floor, view the list of educational courses and download resources. Enhance your trade show experience, and make the most of your time in Kansas City.

Download
The Precast Show 2022 app
at the Apple Store or
Google Play for the
most up-to-date schedule.

Special Thanks To
The Precast Show
Premier Sponsor

Four for the Show Floor

1. Free Wi-Fi courtesy of JVI:
Search for TPSfreewifi on your phone, computer or device. Password is tpsfree.

2. Free food and drinks (including a daily host bar). Check your schedules.

3. Listen for Daily Prize Giveaways.
You must be on the show floor to win.

4. Use the event app or look for “You Are Here” signs to find exhibitors.
Work Smarter, Not Harder!

Manage EVERYTHING with Titan 3000

- Comprehensive precast-specific plant management software
- Designed specifically for the precast concrete industry
- Combines critical administrative, financial and production management processes into one integrated software and mobile apps package
- Streamlines work flow, boosts production, reduces errors and duplication

Here’s what precasters say about Titan

“It ties everything together.”
Chad Nance, Nance Precast Concrete Products

“It really helps to break down silos, encourage communication and make sure everyone is literally on the same page.”
Joshua Martin, Terre Hill Concrete

“We do everything on Titan. Credit, collections, all our receivables, all our invoicing. It does everything — soup to nuts.”
Kirby O’Malley, Garden State Precast Inc.

The Precast Show 9
Special Events

The Precast Show® Plant Tours

Continental Breakfast
Begins at 5:00 a.m.
Marriott, Second Floor, Basie Ballroom

Buses depart from the Marriott Kansas City Downtown beginning at 6:00 a.m.

The Precast Show 2022 Plant Tours include the option of visiting one, two or three facilities.

The Precast Show Plant Tour – Single
Thursday, March 3
6:30 a.m. – 9:00 a.m.

Member/Non-Member
Full Package $70/$110
Trade Show Only $145/$225
Child $0

The Precast Show Plant Tour – Double
Thursday, March 3
6:00 a.m. – 10:15 a.m.

Member/Non-Member
Full Package $95/$135
Trade Show Only $170/$250
Child $0

The Precast Show Plant Tour – Triple*
Thursday, March 3
6:00 a.m. – 11:00 a.m.

Member/Non-Member
Full Package $120/$165
Trade Show Only $195/$275
Child $0

*NOTE: This tour is scheduled to return to the hotel at 11:00 a.m. Because of this, Master Precaster graduates should not attend this event because of overlap with graduation ceremonies.

Forterra Pipe & Precast – Independence, Mo.

This facility is included in the Single and Triple packages.

Location: Independence, Mo.

Plant host: Tim Jones, director of operations

Property size: 21.25 acres (70,000 square feet)

Number of employees: 35

Years in business: 55

Products: Circular manhole sections; square and rectangular precast boxes and culverts; concrete utility buildings.

Mixing and production equipment: Siemens’ 2-yard mixer; precise panel forms; 48-inch to 120-inch round manholes.

Interesting jobs and projects: Small box concrete buildings used for utility and communication companies.

Safety equipment needed: Please wear closed-toed shoes (steel-toed preferred). Hard hat, safety vest, safety glasses and hearing protection provided.

Camera and video equipment is allowed.
Forterra Pipe & Precast – Bonner Springs

This facility is included in the Double and Triple packages.

**Location:** Shawnee, Kan.

**Plant host:** Tim Jones, director of operations

**Property size:** 22.7 acres (47,500 square feet)

**Number of employees:** 42

**Years in business:** 25

**Products:** Concrete pipe and concrete products manufacturing.

**Mixing and production equipment:** PH 48 pipe machine; Mid-America precast box; Hawkeye drycast.

**Interesting jobs and projects:** Small box concrete buildings used for utility and communication companies.

**Safety equipment needed:** Please wear closed-toed shoes (steel-toed preferred). Hard hat, safety vest, safety glasses and hearing protection provided.

**Camera and video equipment is allowed.**

PRETECH Corp.

This facility is included in the Double and Triple packages.

**Location:** Kansas City, Kan.

**Plant host:** Bill Bundschuh, president

**Property size:** 20 acres (44,000 square feet)

**Number of employees:** 65

**Years in business:** 29

**Products:** Storm inlets; storm and sanitary manholes; reinforced concrete pipe; utility structures; electrical manholes and vaults; MSE walls; other retaining walls; arched bridges (precast bridge abutments, pier caps, grade beams and wing walls); reinforced concrete box culverts; miscellaneous concrete structures.

**Mixing and production equipment:** Turmac batching system with a Haarup Planetary Counter Current Mixer (2250L) and adaptive operating system for the dry cast operation; Con-E-Co Low Pro 5 wet cast batch plant; Schlusselbauer Exact 2500 pipe machine; Zublin/Apilion ASMS 150 AS wire welding cage machine; Weiser wet cast reinforced box culvert forms; New Hampton and other wet cast manhole and pipe forms.

**Interesting jobs and projects:**

- **Army Corp. of Engineers Turkey Creek.** Included 6,000 feet of reinforced concrete block from 16-feet-by-9-feet down to 6-feet-by-5-feet along with 1,230 feet of 96-inch Class V jacked concrete pipe. This job also included various storm structures and reinforced concrete pipe.

Download The Precast Show 2022 app at the Apple Store or Google Play for the most up-to-date floor plan.
• **Offutt AFB in Omaha, Neb.** Included 10,600 feet of reinforced concrete pipe Class III to V of various sizes from 60 inches down to 15 inches and various large aircraft-rated storm structures.

• **Kansas City International Airport expansion.** Included 6,000 feet of reinforced concrete box culverts from 10-feet-by-6-feet down to 5-feet-by-5-feet along with 10,000 feet of reinforced concrete pipe from 54 inches down to 15 inches. Also included various aircraft-rated storm structures.

_Safety equipment needed:_ Please wear closed-toed shoes (steel-toed preferred). Hard-hat and safety glasses.

_Camera and video equipment is allowed._

This annual event celebrates the graduates of NPCA’s Master Precaster program. We also honor the winners of the Best Practices Awards Competition and recognize NPCA Certified Plant anniversaries and top scores before hearing from a keynote speaker who shares analysis and insight into industry trends.

Michael Hoffman is president of Igniting Performance, a Dallas-based company that specializes in the skills of sales, customer loyalty and leadership. During the past 20-plus years, Michael has delivered professional speaking engagements and customized training to organizations across this country and abroad.

Michael’s unique delivery and rich background drives home his message that business is and will always be about people. How we approach our customers both internal and external sets us apart from all competition.

---

**The Precast Show Optional Tour: KC’s Visual Voice**

Thursday, March 3  
8:15 a.m. - 10:45 a.m.  
Buses depart from the Marriott Kansas City Downtown lobby at 8:15 a.m.

Union Station, known as Kansas City’s front porch, is an architectural masterpiece and a family-friendly favorite. After a continental breakfast in one of the many historic nooks, guests then will enjoy a historical tour of Union Station followed by a visit to either Science City or The Planetarium. Perfect for kids and adults alike.
The Precast Show Grand Opening
Thursday, March 3
2:00 p.m. – 7:00 p.m.
Welcome Reception on the Trade Show Floor.
(Open to all registered attendees. Includes hors d’oeuvres & host bar. 4:00 p.m. – 7:00 p.m.)

See all Product Presentations details on page 15.

Product Presentations
Thursday, March 3
• 3:00 p.m. – 3:45 p.m. Allplan
• 4:30 p.m. – 5:15 p.m. CarbonCure Technologies
• 6:00 p.m. – 6:45 p.m. U. of Nebraska/Illinois Tech
Presentations Area on Trade Show Floor

Friday, March 4
• 1:30 p.m. – 2:15 p.m. Brickeye Inc.
• 3:00 p.m. – 3:45 p.m. Titan 3000 Precast Management System
Presentations Area on Trade Show Floor

Product presentations on the trade show floor provide a 45-minute deep dive into a specialized area of precast concrete production. Hear experts discuss the latest technology and demonstrate the features of their equipment and products.

Women in Precast Reception
(Hosted by PCI)
Thursday, March 3
7:00 p.m. – 8:30 p.m.
Loews Hotel, Beautiful City Ballroom E

Celebrate the power of women in our industry at this annual PCI-hosted reception. This is an opportunity to mingle, connect with peers and engage in conversations about unique issues faced by women in the precast concrete industry. Join in a lively, fun ice-breaker that includes prizes, stemless wine glass takeaways and complimentary wine, beer and appetizers. Registration is free and open to all self-identified women in the precast concrete industry.

The Precast Show
Friday, March 4
11:00 a.m. – 5:00 p.m.
Buffet Lunch on the Trade Show Floor.
(Open to all registered attendees. Includes Buffet Lunch on the Trade Show Floor. Noon – 1:30 p.m. and host bar 3:00 p.m. – 5:00 p.m.)

The Precast Show
Saturday, March 5
10:00 a.m. – 1:00 p.m.
Includes brunch and host bar on the Trade Show Floor.
(Open to all registered attendees.)

NPCA Foundation Student Design Competition
Friday, March 4
11:15 a.m. – 12:45 p.m.
Presentations Area on Trade Show Floor

The Precast Show Final Event: The Roaring ’20s
Saturday, March 5
6:00 p.m. – 10:00 p.m.
Midland Theatre
Meet in Lobby 2200 of the Kansas City Convention Center at 5:30 p.m.

Member/Non-Member
Full Package $110/$210
Trade Show Only $215/$245
Child $55

Travel back in time to 1920s Prohibition and enjoy live music, food, dancing and drinks at the Midland Theatre, home to one of Kansas City’s most famous speak-easies. This 3,200-seat theater, constructed in 1927, includes more than 500,000 feet of gold leaf decorating spectacular plaster and woodwork. Used originally as a movie house, complete with pipe organ, the Midland Theatre’s five levels recently were restored to their original look alongside performing stages, bars and lounges to entertain any guest.
NPCA Foundation and PCI Foundation Silent Auction

The NPCA Foundation and PCI Foundation once again are hosting a silent auction at The Precast Show. Attendees should download the free Handbid app to their smartphones to view and bid on items. All net proceeds will benefit the NPCA Foundation and PCI Foundation, which support outreach and education within the precast and prestress industries. Thank you to all who support the auction with their generous donations and bids.

The auction will close promptly at 1:00 p.m. CT on Saturday, March 5.

To learn more about the foundations, visit precast.org/foundation and pci-foundation.org.

NPCA Foundation Student Competition

Friday, March 4
NPCA Foundation Student Design Competition
11:15 a.m. to 12:45 p.m.
Presentations Area on Trade Show Floor.

Winners to be announced prior to
Titan 3000 Product Demonstration at 3:00 p.m. Friday, March 4.

Congratulations to the top two teams competing in the 2022 NPCA Foundation Student Competition – California State University-Chico and the New Jersey Institute of Technology. Both teams will compete to find the best precast concrete solution for a real-world construction project. Best of luck to all students.
Product Presentations

The following Product Presentations are open to all Full Package and Trade Show attendees. These demonstrations will take place in the Product Presentation area in the southwest corner the Kansas City Convention Center.

Thursday, March 3

3:00 p.m. – 3:45 p.m.  
Allplan Inc.

Join Frank Holz and David R. Loughery as they demonstrate how easy it is to use Allplan APPs for underground structures. APPs are fully customizable, reinforced precast project models, available right out of the box. Holz and Loughery then will show how to easily generate shop drawings and rebar schedules directly from the model as well as how to design precast buildings and parking structures with Allplan Planbar. Finally, they will show how to use data from a 3-D model to streamline project management, production, shipping and erection.

4:30 p.m. – 5:15 p.m.  
CarbonCure Technologies

Join Shannon Seipel, Director of Technical Services and Support at CarbonCure, as she demonstrates CarbonCure’s innovative CO₂ technology that enables precast/prestressed producers to deliver more sustainable products without sacrificing strength or performance. Join us for an in-depth look at how CarbonCure’s technology works – from testing and mix optimization to seamlessly integrating into regular production.

6:00 p.m. – 6:45 p.m.  
U. of Nebraska/Illinois Tech

Demonstration of deformation behavior of precast concrete insulated wall panels.

Friday, March 4

1:30 p.m. – 2:15 p.m.  
Brickeye Inc./AOMS Technologies

Lumicon Concrete Sensors allow quicker stripping of forms and movement of elements, improved quality and critical data and insight for mix design optimization. Learn how concrete maturity sensors are leveraged in precast production.

3:00 p.m. to 3:45 p.m.  
Titan 3000 Precast Management System

Titan 3000 goes mobile. From quality control and scanning inventory to picking loads and getting delivery tickets signed, you now can streamline key plant processes through a cellphone. Learn more about mobile enhancements to Titan 3000’s Precast Plant Management System at this informative session.

PCA helps members to network, share knowledge and grow their businesses. The scope of our work continues to expand as safety, quality control, educational, technical services and outreach become even more important in this digital age.

Part of NPCA’s mission is supporting members and their employees at all levels to stay abreast of the challenges and changes of today, including how they affect not only their roles but the roles of colleagues and customers. Regulations, new technology, evolving best practices, shifts in state and federal funding and understanding labor shortages and how to best address them all affect your business.

An educated workforce is the best way for a company to prepare for the future. Along with its traditional live and virtual training, NPCA is empowering its member facilities to identify, train and retain that workforce through the new Onboarding Program. This company-tailored program introduces newly hired employees to each organization’s expectations, behaviors and culture while building loyalty and trust. The program contains guidance and resources to get workers to 100% productivity sooner while addressing their specific motivations and skills.

In addition, precasters must continually ensure their place at the table. Through ongoing outreach to engineering firms, educational institutions, federal agencies, DOTs and local municipalities, NPCA positions precast as the optimal solution for modern construction. NPCA highlights precast products, member facilities and the employees who work there, crafting messages that focus on the technical expertise required to produce highly engineered products. Resilience, sustainability, durability and diversity will become synonymous with the precast concrete products that can get to market quicker and are superior to alternative materials.
These messages reach stakeholders and the public at large through both NPCA-led initiatives and grassroot member campaigns, maximizing social media and other avenues for communication.

NPCA’s services are broken down into six main areas:

- Technical
- Membership
- Education
- Outreach
- Workforce Development
- Meetings

Stop at the NPCA exhibit booth on the trade show floor to find out more!

We are working every day to provide the data and resources that help you meet the ongoing challenges of a highly competitive industry.
Take a Break
Visit the Bookstore!

- Purchase the latest technical manuals and books.
- Get your technical questions answered by precast/prestress expert engineers.
- Relax and enjoy a cup of coffee.
- Read the industry’s leading publications.

Advancing Canada’s Infrastructure for over 60 Years.

Check out our new book that celebrates and expands on the rich history of CPCI and the precast prestressed concrete industry in Canada. In this 60th year publication, we have added some noteworthy and significant projects from the years 2011 through 2021.

CPCI is also proud to celebrate the induction of seven new Industry Titans to the CPCI Titan Registry. Titans are individuals who have greatly accelerated the growth of the precast prestressed concrete industry or who, by their actions, changed the direction of the industry and advanced the industry as a whole.

View CPCI’s 60th Anniversary Book - “Advancing Canada’s Infrastructure for over 60 Years” on our website, under the Technical Publications page: http://www.cpci.ca/en/resources/technical_publications/

CPCI would like to congratulate NPCA, PCI and Members on another successful Precast Show!
The Precast Show 2022 welcomes NCMA and ICPI, offering producers and suppliers of the manufactured concrete masonry and hardscape industry an opportunity to network with fellow concrete-related businesses. The Precast Show events are available to all registered ICPI and NCMA members who purchased an event package through NCMA or ICPI.

Boot Camps for Production Personnel

ICON Basic and Advanced Boot Camps for Production Personnel return during The Precast Show. The camps provide interactive learning with opportunities to visit The Precast Show and an exclusive Boot Camp “Rock the Block” social event Friday evening. Registration is required for each Boot Camp session.

- **Members:** $325 per camp
- **Non-members:** $425 per camp

**ICON Advanced Boot Camp**
Thursday, March 3 • 7:00 a.m. – 11:00 a.m.
Kansas City Convention Center • Room 2504 A

The curriculum for the Advanced Boot Camp includes interactive sessions that address the following topics:

**How To Keep the People We Have**
The need to keep employees connected and engaged is more important and more expensive than ever before. This presentation provides practical, real-world strategies for increasing retention and reducing turnover in the age of COVID-19.

**Speaker:** Cyndi Dodge, vice president of human resources, Solomon Colors Inc.

**How To Manage People in Trying Times**
Managing employees effectively is challenging enough without a pandemic. Employees are calling out sick, refusing to wear masks and don’t start with vaccine mandates. This is a practical and interactive presentation on how to navigate employee stress, conflicts between co-workers and legal mandates while still running a business.

**Speaker:** Cyndi Dodge, vice president of human resources, Solomon Colors Inc.

**How to Manage the Business**
Learn from an experienced block producer on how to deal with supply chain shortages and how to manage product waste. This segment will address keeping track of raw material inventory and parts, strategies to determine what parts and repair items are essential and keeping them in stock so they are readily accessible. Building relations with suppliers and local businesses are key to running a successful business.

**Speaker:** Rocky Fizzano, Fizzano Brothers Concrete Products

**ICON Basic Boot Camp**
Friday, March 4 • 7:00 a.m. – 11:00 a.m.
Kansas City Convention Center • Room 2504 A

The curriculum for the Basic Boot Camp includes interactive sessions that address the following topics:

**Know the Raw Materials**
Understand the basic materials that go into the production of concrete masonry products: aggregates, cement, pozzolans (fly ash and slag), pigment and admixtures. Learn how each material works, which materials to use and how much of each to put in our mix designs.

**Speaker:** Craig Walloch, vice president – technical support and education, ACM Chemistries Inc.

**Understand the Manufacturing Process and How I Can Affect the Product**
Understand the basic steps in the manufacturing process and the importance of having proper mix sequence, filling of the feed drawer and mold, compaction, curing and packaging. Learn about easy checks you can do online and machine adjustments you can make to ensure you are making quality products.

**Speaker:** Dean Jurik, vice president – sales and marketing, ACM Chemistries Inc.

**“Rock the Block” Reception**
Friday, March 4 • 7:00 p.m. – 10:00 p.m.

“Rock the Block” is an exclusive reception for attendees of both the Basic and Advanced Boot Camps.
The ICON Virtual Plant Tour

Thursday, March 3
11:00 a.m. – 2:00 p.m.
Kansas City Convention Center • Room 2505 AB
The ICON Virtual Plant Tour gives attendees the opportunity to see the inner workings of paver and concrete masonry facilities worldwide. This event is free and open to walk-up participation.

• Basalite Concrete Products, Dupont, Wash., presented by Quadra
• Johnson Concrete Products, Concord, N.C., and York Building Products, York, Pa., presented by Besser Company
• RCP Block & Brick, San Diego, Calif., presented by Columbia Machine Inc.
• Reimers Kaufman Concrete Products, Lincoln, Neb., presented by Pathfinder Systems
• SW Umwelttechnik, site Alsózsolca, Hungary, presented by Rekers NA Inc.
• Tobermore Concrete, Tobermore, Northern Ireland, presented by Topwerk America

Refreshments will be served during the plant tour, and each company will have a prize drawing during the tour. Producer attendees must be present to win.

Interlocking Concrete Pavement Institute
As the leading technical organization on segmental concrete pavement systems, the ICPI provides substantial resources to concrete paver producers, contractors, suppliers, design professionals and consultants. Members representing this growing industry support the association’s mission to increase the awareness, acceptance and use of segmental concrete pavement systems in the United States and Canada, while utilizing its wealth of resources to gain a competitive business edge. Visit www.icpi.org. Booth # 1042

National Concrete Masonry Association
NCMA unites, supports and represents the producers and suppliers of concrete masonry systems, including concrete masonry, manufactured stone veneer, segmental retaining walls and other hardscape systems in the United States and Canada. NCMA advocates to safeguard the work of its members and promotes its members’ products as the first choice for designers, builders and property owners so communities are improved and made more resilient. From small family-owned business to large corporations, NCMA membership reflects the spectrum of companies that provide the foundation for resilient building construction. Visit www.ncma.org. Booth #1042.

NPCA’S Precast University

Starting with the fundamentals of precast concrete production and progressing through advanced technical, safety and leadership topics, NPCA’s Precast University offers a comprehensive series of precast-specific training courses for anyone who wants to advance in the industry. Precast University brings together all of NPCA’s Production & Quality School (PQS) courses in a career path that concludes with an industry-recognized certification – the Master Precaster designation.

Taught by leading industry experts, PQS courses dive deep into topics in concentrated learning sessions during The Precast Show. Some PQS courses are available online or by webinar, with in-person courses occasionally offered in locations throughout the United States. Courses include:

- Production & Quality School (PQS I)
- PQS II – Safety
- PQS II – Production
- PQS II – Technical
- PQS II – QA/QC
- PQS III – Leadership

Completing the curriculum earns the participant the designation of Master Precaster, with a graduation ceremony held each year during The Precast Show. For complete information, visit precast.org/education.

The requirements for PQS II-Safety have been updated to better accommodate participants who already have earned an OSHA Safety Card. Participants who meet one of the following requirements will receive full credit for completion of PQS II-Safety:

- Successful completion of NPCA’s PQS II-Safety: Precast Module (available online at precast.org/education) AND hold a valid OSHA 10-hour Safety Card.
- Hold a valid OSHA 30-hour Construction Safety Card.
- Hold a valid OSHA Authorized Trainer Card.

If you have an OSHA 30-hour or an OSHA Authorized Trainer Card, you must submit a copy of your valid OSHA card along with the application to NPCA to receive credit for PQS II-Safety. The application may be found at precast.org/oshacard.
PQS – Production & Quality School
Level I (PQS I)

Eric Carleton, P.E., Precast Consultant

Production & Quality School (PQS I) is NPCA’s flagship course and is the perfect starting point to provide plant personnel with the fundamentals of quality precast concrete manufacturing. Designed for all production personnel and QC inspectors, this course covers all aspects of manufactured concrete production – from raw materials to post-pour inspection, with special emphasis on maintaining quality throughout the entire manufacturing process. This course satisfies the plant certification requirement of the current edition of the NPCA Quality Control Manual for Precast Concrete Plants.

Attendees who successfully complete PQS Level I will be able to:

- Identify the key components for making quality precast concrete and proper handling techniques for each.
- Describe in detail the entire manufacturing process of producing quality precast concrete from pre-production to post-production.
- Calculate the impact of temperature of aggregates, cement and water on concrete mixes.
- Convert metric reinforcement bar sizes to ASTM standard reinforcing bar sizes.
- Explain the fundamental elements of a quality concrete mix design and troubleshoot potential mix design flaws.
- Create a quality control manual specific to plant production practices while incorporating industry best practices.

PQS I
Tuesday, March 1 (Day 1)
8:00 a.m. – 5:00 p.m.
2102 B

PQS I
Wednesday, March 2 (Day 2)
9:00 a.m. – 5:00 p.m.
2102 B

NOTE: Participants in this school are required to attend both days of class and pass the exam to obtain a certificate of course completion. Please make your travel arrangements accordingly.

PQS2 – PQS II – Production (PQS II)

David Jablonsky, P.E., FPCI, ALP Supply
Todd Jones, ALP Supply
Barry Fleck, ALP Supply
Todd Spindler, Sika Corp.
Ashley Smith, Smith-Midland Corp.
AJ Krick, Smith-Midland Corp.
Claude Goguen, P.E., LEED AP, NPCA

PQS Level II – Production is designed for plant personnel who will benefit from a comprehensive understanding of precast-specific production practices in four key areas: lifting and handling, issues related to production practices, lean manufacturing, and patching and repair. This course goes beyond the fundamentals explored in PQS Level I to prepare students to think critically about the links between these four areas and common plant production and safety issues. Course participants will go in-depth in exploring these topics, discussing best practices and learning to address production challenges in their plants. Shift supervisors, team leaders, production managers, batch plant operators, engineering and drafting personnel and those who aspire to these positions should attend.

Attendees who successfully complete PQS II – Production will be able to:

- Explain the key concepts of lean manufacturing and develop an action plan for implementing simple lean techniques.
- Identify the difference between structural and cosmetic repairs and employ the appropriate patching/repair techniques for each.
- Determine the most likely causes of cosmetic and/or structural concrete issues.
- Analyze the current lifting and handling techniques in your plant and assess these techniques to identify potential areas of improvement for plant safety.

PQS II – Production
Tuesday, March 1 (Day 1)
8:00 a.m. – 5:00 p.m.
2103 C

PQS II – Production
Wednesday, March 2 (Day 2)
9:00 a.m. – 5:00 p.m.
2103 C

NOTE: Participants in this school are required to attend both days of class and pass the exam to obtain a certificate of course completion. Please plan your travel arrangements accordingly.
PQS3 – PQS III – Leadership (PQS III)
Sam Lines, Concrete Sealants Inc.

Attendees of this workshop will learn what it means to be a leader – learning to lead themselves and influence others. The discussions, skits and activities presented will enhance the skills and knowledge necessary to become a person of influence. Attendees will learn key attributes required to build teams, select employees and motivate others to accomplish the goals of the organization. Anyone who wishes to be a person of influence in their company, their community or in any organization is encouraged to attend this course.

Attendees who successfully complete PQS III – Leadership will be able to:
- Lead by example, creating a vision that others will want to follow.
- Build teams of individuals with unique, complementary strengths.
- Identify effective methods to motivate others, increasing performance.
- Become a transformational change agent for their organization.

PQS III – Leadership
Tuesday, March 1 (Day 1)
8:00 a.m. – 5:00 p.m.
2105

PQS III – Leadership
Wednesday, March 2 (Day 2)
9:00 a.m. – 5:00 p.m.
2105

NOTE: Participants in this school are required to attend both days of class and pass the exam to obtain a certificate of course completion. Please plan your travel arrangements accordingly.
Concrete Production

The Concrete Production Track explores best practices in the precast industry and strengthens attendees’ knowledge of the fundamentals of quality precast concrete. Courses are designed for those involved in the daily production of quality precast concrete products and include safety and other topics that are appropriate for those seeking a broad range of knowledge in precast production.

CP1 – Fiber Reinforced Concrete: New ACI Design Guides and Other Developments

Friday, March 4  •  8:00 a.m. – 9:30 a.m.  •  2210
Michael A. Mahoney, P. Eng., M.A.Sc., FACI, Euclid Chemical Co.

The use of fiber-reinforced concrete (FRC) continues to evolve and become more commonplace in everyday concrete and precast construction. Learn how the new ACI 544.4R document can help precast producers and engineers by providing a roadmap to designing FRC for many applications, including walls, tanks, and other precast elements. Mixture design impacts and expectations will be discussed along with improvements in ASTM and other test methods to verify correct fiber selection and quantities in concrete.

At the conclusion of this course, you will be able to:

• Discover current industry resources and certifications available for fibers.
• Determine how and where to use FRC in precast concrete.
• Identify the differences between fiber types and limitations in precast concrete.
• Determine the cost benefits of using fibers in precast concrete.

CP2 – Precast 101

Friday, March 4  •  8:00 a.m. – 10:00 a.m.  •  2208
Kayla Hanson, P.E., NPCA

With the precast concrete industry constantly growing and evolving, companies continually are hiring new employees. Ensuring those employees get up to speed swiftly can improve teamwork, reduce mistakes and help new hires quickly become integral team members. This course is intended for those who are new to the precast industry as well as those who may have been in the industry for some time but haven’t had a chance to learn about what happens in a precast plant and why. This course includes an introduction to basic concepts, including terminology, different types of concrete used in the precast industry and its uses, raw materials, different types and applications of reinforcement, typical production practices, common curing procedures, fresh and hardened concrete tests, safety and the importance of quality control and quality assurance.

At the conclusion of this course, you will be able to:

• Define precast concrete terminology and processes, discuss the principles of QA/QC, and explain the benefits of precast.
• Differentiate between different types of concrete and their common applications.
• Explain the role of each raw material in a concrete mix.
• Explain typical production practices, curing procedures and the purposes behind them, and identify various fresh and hardened concrete tests.
CP3 – Day-to-Day Production Challenges in the Precast Plant - A Discussion Forum

Friday, March 4 • 10:30 a.m. – Noon • 2210
Panelists: Paul Torrey, Arrow Concrete Products Inc.
Jeremiah Hurley, Speed Fab-Crete
Doug Starr, Barbour Concrete, a Forterra Company
Moderator: Jon Maxwell, Arrow Concrete Products Inc.

Precast concrete production involves many materials, machines and employees. Inevitably, challenges can pop up on any given day. Wouldn’t it be great to have a group of people in the room who do what you do and have some advice to offer? This course provides that opportunity. Bring your questions and join the discussion with a panel of experienced precast concrete managers and supervisors from across the United States, representing a variety of precast products. These NPCA Master Precaster panelists will share some of their most challenging situations and how they handled them. This will be an interactive course where attendees can share their own experiences and ask for advice from others who have been there. This sharing of experiences and knowledge can provide valuable ideas to take back and use when the next challenge falls in your lap.

At the conclusion of this course, you will be able to:
- Describe new ideas when dealing with plant employee issues.
- Identify innovative ways to deal with unexpected manufacturing challenges.
- Interpret challenges described by others and apply some of those solutions in your plant.

CP4 – Lifter Safety for Precast Products

Friday, March 4 • 10:30 a.m. – Noon • 2207
Clint Kilborn, Leviat

Proper lifting is paramount for every precaster. This course is intended to inform personnel in a precast plant at all levels, from engineering to the production floor, how to safely design, identify, place anchors and ultimately lift precast elements. A plant’s production team trusts its engineers to design a product with a certain type of lifter in a precise location with certain sling angles and designate what PSI concrete is to be used. This course will go through almost every scenario of why it is done this way and will build awareness that you are dealing with lift safety products, which should eliminate complacency.

At the conclusion of this course, you will be able to:
- Define different styles of lifting anchors.
- Recognize the effects of concrete strength on lifters.
- Differentiate between a safe working load and an ultimate load.
- Inspect clutches for bend or damage.

CP5 – Precast Concrete Architectural Repairs

Saturday, March 5 • 8:00 a.m. – 9:30 a.m. • 2215 B
Jaime Bernal, Metro Precast & Stone Services Inc.

The versatility of precast concrete and the advancing technology of manufacturing have enabled producers to make aboveground structures resemble any material. With this array of finishes comes the challenge of repairing them when the unforeseen happens. Anyone who has done architectural concrete repair knows it is practically an art to make the repair look like it never happened. We will discuss best practices on material choice, repair preparation and repair procedures for architectural finishes. This is a must-attend for anyone involved in manufacturing of aboveground precast products with architectural finishes.

At the conclusion of this course, you will be able to:
- Recognize best practices for material choice and repair preparation.
- Identify repair procedures for architectural finishes.
CP6 – Troubleshooting Precast Production: Problems and Solutions
Saturday, March 5 • 8:00 a.m. – 11:00 a.m. • 2211

There are many components to producing quality precast concrete products. Raw materials, mix design, reinforcing, consolidation and curing all play a part in achieving the final product. In this interactive class, attendees will learn from an expert and from each other. Mel Marshall will lead a discussion of best practices and solutions to production issues that precasters deal with every day. Bring your questions as we will address your production issues and discuss how to resolve them.

At the conclusion of this course, you will be able to:
• Identify sources of common precast production challenges.
• Troubleshoot quality control issues.
• Take at least three new ideas back to your plant to help improve your production process.

CP7 – Proven 3-D BIM Automation Tips to Significantly Decrease Detailing Time
Saturday, March 5 • 9:45 a.m. – 11:00 a.m. • 2210
Jon Recknagel, P.E., Trimble Solutions USA

How would your day-to-day change if you could use automation to reduce your time spent detailing projects by 30-40% while cutting your error rate in half? This could be your reality when you choose the right 3-D building information modeling (BIM) technology to streamline your workflow and automate labor-intensive and error-prone tasks. This course covers every step of a typical workflow with 3-D models: from generating concrete shapes and reinforcing them to producing automatic views, dimensions, rebar cut lists and bills of material (BOM). Our precast experts will share proven tips on using 3-D models to reduce the time you spend on detailing.

At the conclusion of this course, you will be able to:
• Quickly generate and reinforce any product shape.
• Automatically place lifters around the center of gravity of complex shapes.
• Generate automatic drawings, rebar bending tables and BOM and update them based on changes to the model schedules.
• Develop you own library of parametric products.

CP8 – Raise Concrete Quality with Effective Temperature Monitoring: The Latest in Concrete and Ambient Temperature Measurement Technology
Saturday, March 5 • 10:00 a.m. – 11:00 a.m. • 2215 B
Michael Kraft, Kraft Curing Systems GmbH

Temperature plays an important role in the development of concrete properties. Hydration will raise internal concrete temperature, and that evolution is related to strength development. The ambient temperature in the casting environment also has an impact on both fresh and hardened concrete properties. Concrete temperature during casting and curing can affect admixture performance, placement and setting of the product. During the curing of concrete, ambient temperature and internal concrete temperature influence the quality and durability of the hardened structure. Therefore, it is imperative to monitor both ambient and internal concrete temperatures as well as curing enclosures and testing ovens. During this course, we will first discuss the risks associated with poor temperature control. We then will examine the latest devices that are currently available to facilitate temperature measurement with sufficient accuracy. We briefly will talk about the benefits of using embedded temperature sensors to estimate concrete strength, otherwise referred to as the maturity method. Finally, we will review the latest applicable ASTM and AASHTO standards and their requirements for temperature control devices, valuable information for those involved in the quality control of concrete products.

At the conclusion of this course, you will be able to:
• Explain the potential concrete quality issues associated with poor temperature control and measurement.
• Describe newer technologies related to temperature measuring devices.
• Assess what temperature measuring devices best work for the specific manufacturing process and product.
• List recent changes to applicable standards related to temperature measuring devices.
Leadership and Management

Strong leaders never stop pursuing greatness, and one of the common traits of great leaders is continuous learning. NPCA's Leadership & Management Track is designed for leaders like you who want to continue to grow and develop. Courses are intended for those who have held senior leadership positions or who aspire to hold these positions in the future and are taught by leadership experts both from within and outside of the precast concrete industry.

**LM1 – Welcome Onboard! Simple Strategies to Keep Your New Hires from Jumping Ship**

Friday, March 4 • 8:00 a.m. – 9:30 a.m. • 2215 A
Lisa Ryan, CSP, Grategy LLC

You spend time, money and energy to make sure you hire the right people to help your business succeed. Did you know that your new hires decide whether they are going to stay or leave your organization within the first six months? This makes your onboarding process the most crucial time to make a good impression on new employees. In this course, you will discover strategies to create an onboarding process that focuses on the long-term successful integration of your new hire into your company. From the first day to the first year, you’ll be able to design onboarding guidelines that work for you and your leadership team. If you want to ensure that your new hires stay with you for the long term, this is the course for you.

At the conclusion of this course, you will be able to:

- Discover how to create a clear first impression of the culture and work environment.
- Implement a timeline for employees to meet and understand the role of HR, their direct managers and key co-workers.
- Design a training agenda that gives employees a better understanding of their job duties, policies and team dynamics.
- Map out clear timelines as to what employees should accomplish and understand as they go through the new-hire training.

---

**LM2 – Taking a Shot at Your Title: Be Simple and Become Extraordinary**

Friday, March 4 • 8:00 a.m. – 10:00 a.m. • 2211
Hugh C. Scott IV, P.E., Shea Concrete Products

The 21/90-Rule states that it takes 21 days to develop a habit (positive or negative to your well-being) and 90 days to make that habit a permanent lifestyle change. To make this rule work for you, self-discipline and daily consistent action need to stick. If you took this rule seriously for one year, you would develop 17 new habits and propel your lifestyle forward four times. What would this look like to you? How would you feel? What would you accomplish? What would your future hold? It can be difficult to get the engine of daily progress started, but once that train starts moving down the track, it becomes easier and easier – as long as you put in the daily work. We all have things we wish to accomplish, and for some reason people keep putting those things off until tomorrow, which in most cases becomes never. This course offers you an opportunity to become crystal clear on what those things are and to develop an action plan with a tool to hold yourself accountable. Day 1 or someday, it's always your decision.

At the conclusion of this course, you will be able to:

- Get clarity on your priority to drive your productivity.
- Simplify your life’s vision into measurable goals.
- Discover a higher level of accountability.
- See your progress every day as you develop new habits.

---

Course Level: 🟢 Beginner  🟡 Intermediate  🔴 Advanced
The construction industry was facing a talent shortage, an aging workforce and an inadequate pipeline of younger workers before the pandemic. Now, it's even more crucial to attract and retain the employees you have on your team, especially since employees have found they have options how, when and where they can get their work done. Your business needs to adjust to this new work environment. Companies that succeed in the post-pandemic economy are those that figure out how to master technology, community and collaboration. Yes, employees still have to show up at the job site to get the work done, but business owners may need to adapt to new ways of using technology and communicating with employees and their leadership teams. It is going to be a while before we figure out what the next normal is going to be, but whatever those changes are, there is no more “business as usual.” The only thing we know for certain is that things are going to change.

If you want to keep your top talent from becoming someone else’s, it’s time to master a few simple strategies now and reap the rewards for years to come.

At the conclusion of this course, you will be able to:
• Discover how the pandemic has changed business for good and how to take advantage of these changes.
• Connect with employees from both a personal and professional standpoint during trying times.
• Recognize why communication is more critical than ever before and ensure you are doing it the right way.
• Analyze why ignoring employees’ personal challenges will come back to haunt you.
LM5 – Discussing Ideas for Recruiting Workers: A Panel Discussion

Saturday, March 5  •  8:00 a.m. – 9:30 a.m.  •  2210
Panelists: Hugh C. Scott IV, P.E., Shea Concrete Products
Brandy Rinkel, Wilbert Precast Inc.
Sandra Rodriguez, Premier Staffing Solutions
Liz Wingenbach, Afinitas
Moderator: Marti Harrell, NPCA

Ask any NPCA producer or associate member about what their biggest challenge is, and most answers will be the same: workforce development. Many companies are struggling to find talented individuals to fill open positions. This is not unique to precast, and many industries are competing for the same talent. It can be a crippling issue that results in having to turn down work or delay expansions. Times such as this call for unique strategies to get the attention of suitable candidates and bring them through the door. During this course, a panel of representatives from different precast and product manufacturers will share their experiences and reveal what has worked best for them. Topics will include job fairs, using social media, using incentives and other ideas for recruiting. They will discuss how to deal with the image problem associated with manufacturing positions and how to appeal to different generations of employees. It will be a sharing of ideas that benefits all types of manufacturers seeking to add to their team.

At the conclusion of this course, you will be able to:
• Identify new ideas that could be implemented to enhance recruiting efforts.
• Describe ways to reach potential candidates using social media.
• Analyze how an incentive system may help with recruiting and retaining employees.

LM6 – They Named You Supervisor: Now What?

Saturday, March 5  •  8:00 a.m. – 11:00 a.m.  •  2215 C
Sam Lines, Concrete Sealants Inc.

You excelled as an all-star employee, and the company now wants you to lead the team. It is your first time managing and directing the work of others, and you quickly realize it is not as easy as you thought. The skillset of an effective supervisor or manager is different than that of just being a team member. Using the principles of the book “Welcome to Management” by Ryan Hawk, you will learn how to go from top performer to excellent leader.

At the conclusion of this course, you will be able to:
• Learn to lead yourself on the inside and on the outside.
• Discover how to create a culture of respect, trust, vulnerability and ownership.
• Identify how to select and manage the team roster.
• Uncover the path to leading your team to victory.
The Marketing and Sales Track is geared toward business owners, senior managers, CFOs, marketing personnel and those who aspire to hold such positions. Expert instructors in sales and marketing will provide the latest in philosophy and techniques. These courses will offer the opportunity to network with fellow managers and owners to discuss common challenges.

**MS1 – Critical Path for Precast Project Success: The Field Representative**
Friday, March 4 • 8:00 a.m. – 9:30 a.m. • 2209
Eric Carleton, P.E., Precast Consultant

Producing quality precast products in a safe and efficient manner and getting them to the job site is enough to keep manufacturers occupied, but the work does not end there. Perfection is elusive, and sometimes “stuff happens.” What occurs when a contractor calls about missing structures, problems with a delivery, questions about installation or concerns expressed by the site inspector? How a company addresses these pop-up situations can dictate the likelihood of ongoing sales with a customer. That’s where a dedicated field representative can save the day. During this course, we will discuss the importance of company field representation and how that role may have to go beyond just the delivery driver. We will discuss the importance for customers to have a go-to person they trust to handle last-minute issues – whether it’s your fault or their fault. The presenter will use examples from many years of experience to offer tips and advice on how to satisfy your customers and increase their loyalty.

At the conclusion of this course, you will be able to:
- Define the role and value of a precast manufacturing field representative.
- Describe ways to integrate this role effectively into their company structure.
- Identify the potential benefits of having a field representative in time and cost savings as well as sales.

**MS2 – Sales and Marketing Skills for Precasters**
Friday, March 4 • 8:00 a.m. – 11:00 a.m. • 2214
Monroe Porter, PROOF Management

This workshop offers proven techniques for salespeople. Attendees will learn how to succeed in business-to-business sales and why most commercial marketing programs fail. Learn how to identify the customer’s buying process and decision-maker without creating conflict. Use active listening skills and taglines to gather sales information and close the deal. Learn why target marketing works and develop a sales and marketing strategy. Whether you are a still-at-it 60-year-old or a fire-breathing 20-year-old, this program offers tricks of the trade you will find of immediate value.

At the conclusion of this course, you will be able to:
- Gather sales information and fit within the customer’s buying objectives.
- Differentiate between normal customer service expectations and partnership value that customers will pay more for.
- Recognize basic negotiation tactics and how to respond when being “played.”
- Obtain results when marketing to targeted customers.
- Use active listening skills and other techniques to solve customer problems and close deals.

Download The Precast Show 2022 app at the Apple Store or Google Play for the most up-to-date floor plan.
MS3 – Can You Use Pinterest to Promote Precast?: The Power of Social Media Marketing
Friday, March 4 • 10:30 a.m. – Noon • 2211
Hugh C. Scott IV, P.E., Shea Concrete Products

This course continues the discussion on utilizing social media platforms to drive awareness and sales opportunities for your business. With the majority of social media platforms available at no cost and potentially reaching billions of people worldwide, how can you be sure you are targeting customers in your service area who may be looking for the products you manufacture and the services you provide? From Facebook to LinkedIn to Instagram to Pinterest, the number of platforms you use can be spreading you thin and dwindling your ROI. We will think outside the box, drill down on the social media platforms that work best for your business (as well as discuss ones you may be overlooking) and come up with an action plan backed by accountability to keep you on track. As with anything, consistency is what transforms average into excellence, and Rome was not built in a day.

At the conclusion of the course, you will be able to:
- Identify social media platforms that work best for your business.
- Discover new social media platforms.
- Create an action plan to utilize social media to market your business.

MS4 – The True Value of Exhibiting: What’s Missing from Your Post-Show Calculations
Saturday, March 5 • 8:00 a.m. – 9:30 a.m. • 2209
Robyn Davis, CPTD, Exhibitors WINH LLC

After pouring all your blood, sweat and tears into a trade show, you will want to make sure you have gotten your money’s worth – accounting for every single dollar saved or earned. You are not alone, especially this year. Oftentimes, even the savviest exhibit managers unintentionally overlook opportunities to determine the true value of their exhibiting efforts. Together with your peers and an award-winning exhibitor trainer, you will discover the types of value you can achieve at trade shows.

At the conclusion of the course, you will be able to:
- Reveal 10-plus types of value you can obtain through events such as The Precast Show.
- List your biggest exhibiting value calculation challenges and brainstorm potential solutions.
- Discuss your postshow reporting plans and identify new opportunities to improve your evaluation process.

MS5 – Social and Digital Media 101: Usage, Barriers, and Measurement
Thursday, March 3 • 8:00 a.m. – 9:30 a.m. • Great Hall 3501 B
Moderator: Tom Bagsarian, PCI
Speakers: Becky King, PCI, and PCI members

Attendees will learn the basics of social and digital media, including how to successfully post to social media and be active on social platforms. Speakers will discuss how to determine what to post, how to write interesting and captivating text, and how to select photos to include. Presentations will also cover the power of social media, ways to measure the success of posts, and pitfalls to avoid.

MS6 – Market Research: The Power of Data and Usage
Thursday, March 3 • 10:00 a.m. – 11:30 a.m. • 3501 B
Moderator: Becky King, PCI
Speakers: Brian Miller, P.E., LEED AP, global marketing director, GCP Applied Technologies and PCI members

Market research is used to help companies better understand their customers, how to reach them, what to say, and where to say it. It can be the difference between investing a decent amount to make millions or spending millions only to go out of business. This presentation will provide an overview of how to use market research to help guide your company. It will include the latest construction forecast data and explain how to obtain and use other market resources available from PCI.
Among the most confounding, confusing, and often downright unfair provisions in subcontracts are pay-when-paid or pay-if-paid clauses. There is little consistency from state to state as to whether those clauses are enforceable, whether sureties can take advantage of those clauses, and whether those clauses affect your rights to make claims on bonds or file liens. The session offers help to those navigating this crazy quilt of different laws and court decisions.

This session will help you ensure contract obligations are harmonious with insurance coverages and identify which contractual obligations may leave you exposed to liability.

The session also covers key questions related to additional insured status “where required by written contract”: Must you sign a contract with every vendor? Can a vendor’s employee sue you if they are injured at your plant? Are you always protected under an additional insured endorsement? How can you make sure your subcontractors and vendors are properly covered? How do you minimize the additional insured list in your contracts?

Presenters will address contractual issues related to jobsite delays and weather delays, such as when an extension of time is not an equitable remedy for a crane and crew sitting idle, and they will consider whether an owners and contractors protective liability insurance policy can provide coverage for a contractual indemnification obligation.
OPER4 – Safety Data and Its Due Date: Emerging Trends in Manufacturing and Construction Accident Claims—Has the Dust Settled?
Friday, March 4 • 1:00 p.m. – 2:30 p.m. • 3501 B
Speakers: Scott Rasor, EVP insurance and risk management, Optimum Safety Management
Moderator: Steve Yates, founder and CEO, Optimum Safety Management

This session will be a roundtable discussion on safety topics and OSHA requirements.

OPER5 – Employee Marijuana Use and the Workplace?
Friday, March 4 • 10:00 a.m. – 11:30 a.m. • 3501 B
Speakers: Aaron R. Gelb, partner, Conn Maciel Carey LLP
Moderator: Scott Rasor, EVP insurance and risk management, Optimum Safety Management

This session will explore the changing legal landscape regarding medical and recreational marijuana in states and the District of Columbia. Speakers will address how state marijuana laws affect your compliance with regulations of the U.S. Department of Transportation and other federal agencies. Other topics will include whether medical marijuana is considered a reasonable accommodation under the Americans with Disabilities Act or state disability discrimination laws and how to legally conduct background checks.

OPER6 – Innovations in Precast Concrete Session I
Thursday, March 3 • 10:00 a.m. – 11:30 a.m. • 3501 A
Speakers: Company presenters
Moderator: Trice Turner, PCI

Join PCI and NPCA in advancing the industry as we present unique solutions that move us beyond “the way things have always been done.” The session will highlight current best practices and emerging technologies being developed for and with the precast concrete industry.

OPER7 – Innovations in Precast Concrete Session II
Friday, March 4 • 8:00 a.m. – 9:30 a.m. • 3501 B
Speakers: Company presenters
Moderator: Trice Turner, PCI

Join PCI and NPCA in advancing the industry as we present unique solutions that move us beyond “the way things have always been done.” The session will highlight current best practices and emerging technologies being developed for and with the precast concrete industry.

Download The Precast Show 2022 app at the Apple Store or Google Play for the most up-to-date floor plan.
QC1 – Learning from the Past to Build Better Now

Friday, March 4  •  8:00 a.m. – 9:30 a.m.  •  2215 C
Kimberly Kramer, Ph.D., P.E., S.E., F.ACI, Kansas State University

During the past 20 years, there has been a rising focus on the necessity for a more durable environment. Spurred by increasingly unpredictable natural events, resilient design is being promoted and, in some cases, required on all types of construction projects. This results in buildings, bridges and pipelines that not only can better withstand the stresses of natural and man-made disasters but also extend the life cycle of these structures. Manufacturers must continue to evaluate, design and produce structures to meet this need using the latest technologies in materials and manufacturing, conducting proper testing and utilizing the best quality control practices. However, sometimes the best data comes from our failures. During this course, we will examine some real-life scenarios where failures occurred and the resulting lessons learned. We will discuss the causes and what could have helped prevent these failures. From these discussions, attendees will evaluate how precast concrete systems can be designed to withstand similar causal factors and how to apply this knowledge to enhance their product’s durability and resiliency. The presenter will draw upon her experience as a structural engineer and designer on many projects to explain what truly makes a precast concrete structure resilient.

At the conclusion of this course, you will be able to:

• Define resiliency in the context of the precast concrete products produced.
• Cite causes of actual failures and what could have prevented the loss of that structure.
• Identify areas of focus in precast product design that can enhance resiliency and durability.

QC2 – Precast Concrete Retaining Walls

Friday, March 4  •  8:00 a.m. – 9:30 a.m.  •  2207
Ronald Thornton, P.E., Precast Concrete Association of New York

As transportation infrastructure keeps expanding, the need for soil retention structures is growing. Precast concrete gravity- and soil-reinforced systems are in high demand because of their strength and resilience. When designing and manufacturing these systems, it is important to consider the applicable parameters for proper wall design. Soil properties, slopes, dead and live load surcharges, seismic loads and other factors affect a retaining wall siting and design. During this course, we will discuss these important design factors to accurately estimate, design and manufacture precast concrete retaining wall systems. We will go over some important considerations related to soil characteristics. We will also examine best practices for wall construction, backfill and drainage. The information shared will apply to both gravity and soil reinforced systems.

At the conclusion of this course, you will be able to:

• Identify various types of walls used to retain soil and advantages and disadvantages of each.
• Review the various soil properties necessary to conduct a wall stability analysis and locate these properties in a site Geotech report.
• List the internal and external failure modes to be considered in a wall stability analysis and the required safety factors for each.
• Review industry codes and standards related to retaining wall design.
• Establish best practices for shop drawing preparation to ensure proper manufacturing and installation.
QC3 – Mix Design Adjustments: Quickly and Accurately Adapting to Changes

Friday, March 4 • 10:00 a.m. – Noon • 2215 C
Claude Goguen, P.E., LEED AP, NPCA

Developing mix designs that work for different products or clients are great achievements, but a modification often needs to be made quickly to that design. It could be a change in applicable codes, availability of raw materials or many other reasons. Having the ability to make modifications to those mix proportions and still meet the requirements is crucial for precast concrete producers. During this course, we will start with a mix design and make various adjustments that are representative of the precast industry. Examples include adding SCMs, changing aggregate gradations and changing to lightweight aggregates. Attendees will be encouraged to submit other scenarios they have encountered so we can work through those adjustments together. We also will talk about how to use Excel to develop easy-to-use calculators to facilitate some types of modifications. This is a great course for those wanting to expand their concrete mix design knowledge and streamline their modification processes in the plant.

At the conclusion of this course, you will be able to:
• Describe three things that are necessary to do when making mix design adjustments.
• Identify important resources available to assist with mix design adjustments.
• Incorporate tips in Excel to facilitate mix design modification calculations.

QC4 – The Facts About Using Type 1L Limestone Cement

Friday, March 4 • 10:45 a.m. – Noon • 2208
Nicolas Marks, Continental Cement

A recent push for cement producers to switch from Type I or Type I/II cement to type IL portland limestone cement (PLC) is designed to lower portland cement’s carbon footprint. However, it may not be clear how this change in cementitious materials may influence fresh and hardened concrete properties. During this presentation, Marks will dispel some myths and provide facts about using PLC. He will demonstrate how similar PLC is to Type I/II cement and how it is engineered and manufactured. He will discuss the recommended steps in changing cement to PLC and how it can be used with supplementary cementitious materials such as fly ash and slag. Additionally, he will share how PLC’s provisions currently are included in various codes, standards and specifications across the United States. This presentation also will cover the technical results from various projects including information related to specifying PLC for use in projects.

At the conclusion of this course, you will be able to:
• Describe how PLC’s chemical properties differ from the cement you are currently using.
• Explain PLC’s potential impact on your product’s carbon footprint.
• Discuss how PLC hydrates in comparison to type I/II cement and what that means for fresh concrete properties as well as short- and long-term strength and performance.
• Identify precast related standards and specifications that already include the use of PLC.
• Describe the established performance record of PLC.
The engineering world doesn’t have to be intimidating. There is so much value to be gained by breaking down traditionally challenging concepts — such as structural analysis — into smaller components to investigate what the principles mean, how they work and how they affect the products and structures precasters manufacture every day. In this course, we will study concepts from statistics to structural analysis to better understand how these principles shape the way precast structures are designed, manufactured and installed. We will start by learning about supports, beams, joints and loads. We will introduce how to draw free body diagrams of simple assemblies as well as learn how to sum forces, sum moments and calculate support reactions. We will investigate how loads and moments act on simple assemblies like beams, cantilevers, frames and trusses, and we will assess how loads and moments affect the behavior of these assemblies. Finally, we will investigate how all these components work together to affect the design, manufacture and installation of the products precasters work with every day.

NOTE: To gain the most from this course, participants should be comfortable with algebra (specifically, solving equations with one variable through addition, subtraction, multiplication and division) and familiar with trigonometric functions (specifically sine, cosine and tangent). A brief review of these concepts will be provided at the beginning of the course. Additionally, a calculator or a smartphone with a calculator is required for this course. The calculator must be able to perform sine, cosine and tangent functions. The NPCA Math Prep Class is recommended as a prerequisite for this course.

At the conclusion of this course, you will be able to:

• Define different types of loads and explain how each type affects the product or structure to which the load is applied.
• Identify different components of structural elements including supports, beams, slabs and joints, and explain how they work together to create structures.
• Draw free-body diagrams of simply-supported beams, cantilevers, frames and trusses.
• Demonstrate how to sum forces in the x-direction and y-direction, how to resolve a force into its x- and y-components and how to sum moments in a free body diagram.
• Analyze simply-supported beams, cantilevers, frames and trusses and calculate: support reactions, resultant forces of distributed loads, internal forces in truss members and moments acting on cantilevered beams.
QC6 – Emerging Technology of Using Carbon Dioxide in Precast Concrete

Saturday, March 5 • 10:00 a.m. – 11:00 a.m. • 2209
Sean Monkman, Ph.D., P. Eng., CarbonCure Technologies Inc.

The environmental impacts of concrete production are under increased attention from specifiers, end users and purchasers. Improvements to concrete sustainability will be needed to meet an increased demand without increasing the burden on the environment. The industry is compelled to look beyond traditional ways to lower the carbon impact of concrete and consider new and innovative approaches. One such strategy involves repurposing waste CO₂ and changing it from a pollutant to a beneficial component of a concrete mix. It can be permanently mineralized and removed from the atmosphere. During this course, we will discuss how CO₂ can be captured, converted to a liquid, transported and added to a fresh concrete mix. We will discuss the reaction that occurs that can increase concrete strength and allow more efficient use of cement using real-world case studies and the resulting environmental and product quality benefits. We also will discuss how this technology is evolving and how it can affect the precast concrete industry. The utilization of CO₂ in concrete offers not only environmental benefits but enhanced product quality and potentially lower manufacturing costs.

At the conclusion of this course, you will be able to:
• Describe the process of CO₂ utilization.
• Explain the reaction when CO₂ is added to fresh concrete.
• List the potential benefits of using this technology in precast manufacturing.
Technologies

From R&D to code development, technical sessions will keep you abreast of the latest technical information within our industry. New standards and updates on current research form the foundation for our body of knowledge.

TECH 1 – Solutions to Lower Your Carbon Footprint — A Guide for Precast and Prestressed Concrete Producers
Friday, March 4 • 8:00 a.m. – 9:30 a.m. • 3501 E
Speakers: Claire (Qiwei) Nowasell, Ph.D., LEED green associate, Lehigh Cement Company, LLC
Moderator: Randy Wilson, PCI

Concrete is getting bad rap in the discussion of sustainability even as the definition for sustainability is a moving target. Our speakers will analyze current sustainability trends, explain the importance of product-specific environmental product data, and demonstrate how cement producers are lowering carbon emissions with green concrete. This educational session will help precast concrete producers position their products as a sustainable solution on par with other materials.

TECH 2 – Architectural UHPC — Barriers and Challenges
Friday, March 4 • 1:00 p.m. – 2:30 p.m. • 3501 E
Speakers: Larry Rowland, precast manager, ceEntek Inc.
Moderator: Randy Wilson, PCI

The interest in architectural ultra-high-performance concrete (UHPC) is increasing. This educational session will help precast concrete producers identify barriers and overcome challenges to enter into this emerging market in North America. Speakers will discuss engineering, materials, forming, connections, and other aspects of producing architectural UHPC as compared to traditional architectural precast concrete facades. This will be a great introduction to the materials!

TECH 3 – Advances in Precast Concrete Construction
Thursday, March 3 • 4:00 p.m. – 5:30 p.m. • 3501 B
Speakers: Venkatesh Kodur, Ph.D., P.E., FCAE, FINAE, Michigan State University; A numerical approach for evaluating shear capacity of concrete beams exposed to fire.
Katie Bender, Clemson University; "Shear Capacity of a Tessellated Precast Concrete Specimen"
Moderator: TBD

This session will present the findings of peer-reviewed papers on advances in materials, design, and construction of precast and prestressed concrete components and structures.

TECH 4 – Utilizing UHPC in Precast Bridge Elements
Friday, March 4 • 10:00 a.m. – 11:30 a.m. • 3501 F
George Morcous, Ph.D., P.E., P. Eng., FPCI, University of Nebraska-Lincoln; "Standardized UHPC Decked I-Beam for Accelerated Bridge Construction"
David Gee, e.Construct USA, LLC; "Recommendations for Flexure and Shear Design of Prestressed UHPC Members"
Mostafa Abo El-Khier, Ph.D., e.Construct USA, LLC; "Segmental Match-Cast Post-Tensioned UHPC Beams"
Moderator: TBD

This session will present the findings of peer-reviewed papers on the application of ultra-high-performance concrete (UHPC) in the construction of precast concrete bridge elements, including optimization of section shapes to fully utilize the benefits of UHPC.
TECH5 – Advances in Precast Bridge Deck Construction
Friday, March 4 • 8:00 a.m. – 9:30 a.m. • 3501 F
Speakers: Mostafa Abo El-Khier, Ph.D., structural engineer, e.Construct USA, LLC; Simplified UHPC Deck-to-Girder Connection Using Shear Pockets
Xiaomeng Ge, University of Texas; “Field Instrumentation and Load Testing for Deck Stress Over Precast Panels in Negative Moment Regions”
Moderator: TBD

This session will present the findings of peer-reviewed papers on advances in the analysis and design of precast concrete bridge deck elements and their interface with the supporting girders.

TECH6 – Recent Advances and Experience in FRP Composites to Enhance Precast and Prestressed Concrete Structures
Thursday, March 3 • 2:00 p.m. – 3:30 p.m. • 3501 E
Speakers: Rudolf (Rudi) Seracino, Ph.D., professor, North Carolina State University
John J. Myers, Ph.D., P.E., FASCE, FACI, FIAAM, professor, Missouri University of Science and Technology
Scott F. Arnold, P.E., Fyfe Co. LLC
Moderator: Venkatesh Seshappa, P.E., SE, engineering manager, Gate Precast Company

This session will review recent advancements in fiber-reinforced-polymers (FRPs) that affect the precast and prestressed concrete industry. The sessions will dive into the use of glass-fiber-reinforced polymers and carbon-fiber-reinforced polymers for use in restoring and adding capacity to existing deteriorated precast and prestressed concrete elements. We will review advances in bridge beams and parking garage restoration, including applications that have been completed in the field.

Download The Precast Show 2022 app at the Apple Store or Google Play for the most up-to-date floor plan.
The Precast Show® Education Program Policy*

Educational courses are noncommercial forums. Speakers may cite personal experiences but are expected to refrain from endorsing specific products. Educational courses are not to be used for direct promotion of a speaker’s product, service or monetary self-interest, with the exception of sponsored education courses. Speakers at all courses must refrain from overt statements, harsh language, pointed humor or other harmful communication that may adversely affect the fair and reasonable treatment of any individual or group. Please note any violation of this policy on session evaluation forms or let any NPCA or PCI professional staff member know.

*NOTE: The Precast Show® Education Program Policy does not pertain to educational courses that are non-CEU/PDH. (For example, PCI’s Innovations track and other sponsored education.)

---

**TECH7 – Overview of PCI 124 Specification for Fire Resistance**

Friday, March 4 • 8:00 a.m. – 9:30 a.m. • Great Hall 3501 G
Moderator: Edith Smith, P.E., PCI
Speakers: Matt Huslig, P.E., LPCI, Coreslab (Miami) Inc.
Ali Shrih, County Prestress LLC
Steven Skalko, P.E., Stephen V. Skalko, PE & Associates LLC

This session provides a comprehensive overview of the development, acceptance and use of “PCI 124-18: Specification for Fire Resistance of Precast/Prestressed Concrete.”

---

**TECH8 – Fundamental Behavior, Mechanics, and Design of Precast Concrete Insulated Wall Panels**

Thursday, March 3 • 4:00 p.m. – 5:30 p.m. • 3501 E
Speakers: Matthew J. Gombeda, Ph.D., assistant professor of civil engineering, Illinois Institute of Technology
Marc Maguire, Ph.D., structural engineer, University of Nebraska-Lincoln
Moderator: Edith Smith, P.E., PCI

This session will provide a simplified overview of our current understanding of the fundamental behavior, applied mechanics, and design of precast concrete insulated wall panels. Many different design assumptions and methodologies are currently implemented for these structures, some of which are based heavily on industry experience or conservative approximations. With the development of a PCI design standard, updates to other relevant design guidelines, and several recent research efforts focusing on varying aspects of composite behavior, we have improved insights into the underlying behavior and mechanics of insulated wall panels and their influence on commonly used design assumptions.

---

**TECH9 – Developing a Precast Concrete Buckling Restrained Braced Frame**

Friday, March 4 • 10:00 a.m. – 11:30 a.m. • 3501 G
Speakers: Gino Kurama, Ph.D., P Eng, professor, University of Notre Dame
Laura Redmond, Ph.D., Clemson University
Jon Mohle, SE, senior product and market manager, Clark Pacific
Moderator: Chuck Pizzano, president, Pizzano Consulting Engineers

This session will review recent analytical and experimental investigations into the development and use of buckling restrained braced frames constructed with precast concrete. Analytical studies have shown superior seismic performance of buckling restrained braced frame systems. Research into using commercially available steel buckling restrained braces and fabricating a precast concrete buckling restrained brace have been conducted.
Sponsored Education

**TITAN – Titan Power Users**

Wednesday, March 2 • 3:00 p.m. – 5:30 p.m.
Marriott, Third Floor, Big Joe Turner B

*Member with package: $125  
Non-member with package: $145  
Member A la Carte: $185  
Non-member A la Carte: $225*

This year’s Titan Power Users course will cover all the features that Titan has rolled out in the last year. Created for all users and those interested in the Titan 3000 Precast Management System, the course is designed to increase productivity. We will highlight the suite of Titan plant management modules and mobile apps and take a deep dive into the newest features we’ve added since our last Precast Show course. Our expert trainers will cover concepts and tools to improve productivity, enhance efficiency and build your bottom line. They’ll also point out time-saving features that will boost your Titan skills to a new level. Work smarter, not harder, with Titan.

At the conclusion of this course, participants will understand the core features and latest enhancements of the Titan 3000 Precast Management System, including:

- Titan mobile apps
- Visual estimator and visual takeoffs
- My Dashboard
- New production entry features
- Accounting features, including AP, AR, PO and GL
- BASYS Credit Card Processing
- Customer management features
- And more

**THANK YOU, TITAN!**

Thank You for Being The Precast Show
Premier Sponsor
and for the
Sponsored Education Course!

**www.titan3000.com  •  732-866-8686**
Eric Carleton, P.E., Precast Consultant
MS1 – Critical Path for Precast Project Success: The Field Representative
PQSI – PQS Level I – Production & Quality School

Eric Carleton worked eight years with Armaco Steel Corporation in its construction products division and two more years when the company became Contech Construction Products. He worked 27 years as the technical director and corporate engineer at the Independent Concrete Pipe Company. Carleton retired in August 2021 as director of codes and standards with NPCA. He served as past president for the Indiana Section of ASCE and chairman for the Indiana Water Environment Association Collection Systems Committee. In 2020, Carleton became an NPCA Master Precaster.

Jaime Bernal, Metro Precast & Stone Services Inc.
CP5 – Precast Concrete Architectural Repairs

Jaime Bernal got his start in precast in 1999 working for Arban & Carosi on the casting crew installing the steel cages and connections. Jaime joined Metro Precast and Stone Services Inc. in 2005 as an apprentice stone mason repairing and finishing architectural precast elements. He moved up the ranks quickly at Metro Precast and Stone from crew leader to his current position as project manager.

Robyn Davis, CPTD, Exhibitors WINH LLC
MS4 – The True Value of Exhibiting: What’s Missing from Your Post-Show Calculations

Robyn Davis is known for her fresh perspective and process-driven approach to exhibitor success, providing strategic training and consulting services to exhibitors. She’s received awards such as the Events Industry Council’s “Pacesetters” award and has been on multiple “40 Under 40” lists, MeetingsNet’s “Changemakers” list and more. Her certification is for talent development and her degree is in aerospace engineering.

Barry Fleck, ALP Supply
PQSII – PQS Level II – Production

Barry Fleck has been involved in the precast/prestressed industry since 1972, starting as the sales manager for a manufacturer of cement products. In 1977, he became a founding partner in Pre-Blend Products, a manufacturer of cement-based products that included patching cements, grouts, self-leveling cements and cement-based coating and stuccos. In 1982, he became a partner in ALP Supply, where today he is the owner and CEO. Fleck is a past member of NPCA’s Board of Directors and past chairman of NPCA’s Foundation Board.

Aaron R. Gelb, Conn Maciel Carey LLP
OPER5 Employee Marijuana Use and the Workplace?

Aaron R. Gelb is a partner in Conn Maciel Carey’s Chicago office, where he leads the firm’s Midwest Occupational Safety and Health Administration practice. He regularly advises and represents clients in relation to inspections, investigations and enforcement actions involving OSHA and state occupational health and safety programs, while managing a full range of litigation against OSHA. Gelb also litigates equal employment opportunity matters in federal and state courts and defends employers before the Equal Employment Opportunity Commission and fair employment agencies across the country.

Download The Precast Show 2022 app at the Apple Store or Google Play for the most up-to-date floor plan.
Claude Goguen, P.E., LEED AP, NPCA

PQSII – PQS Level II – Production
QC3 – Mix Design Adjustments: Quickly and Accurately Adapting to Changes

Claude Goguen is NPCA’s director of outreach and technical education. He has nearly 25 years of experience in the precast concrete and construction industry. He holds a degree in civil engineering and is a licensed P.E. Prior to his role with NPCA, Goguen was an operations manager at a precast concrete manufacturing plant. He also worked as a field superintendent, project manager and project engineer on numerous large residential and commercial projects.

Matthew J. Gombeda, Ph.D., Illinois Institute of Technology

TECH8 – Fundamental Behavior, Mechanics and Design of Precast Concrete Insulated Wall Panels

Matthew J. Gombeda is an assistant professor of civil engineering in the Department of Civil, Architectural and Environmental Engineering at Illinois Institute of Technology in Chicago. Gombeda oversees the Structural and Concrete Materials Testing Laboratory on Illinois Tech’s Mies campus. His major research areas include behavior and mechanics of reinforced and prestressed concrete structures, innovative precast concrete components, innovative cementitious materials, blast design and analysis methodologies, progressive collapse mitigation, and experimental methods. He is an active voting member of multiple PCI technical committees, including Design Standard (and its Insulated Wall Panels Task Group), Precast Insulated Wall Panels, and Blast Resistance & Structural Integrity committees, as well as several ACI, ASCE and ASTM technical committees.

Kayla Hanson, P.E., NPCA

CP2 – Precast 101
QC5 – Engineering for Non-Engineers: A Study of Loads and Moments in Structural Elements

Kayla Hanson graduated from Purdue University with a degree in civil engineering and emphasis in structures. Hanson is a licensed professional engineer in Indiana. As NPCA’s director of technical services, she works to coordinate the projects of NPCA’s technical services engineering team. She addresses technical questions from engineers, architects and precasters; reviews and updates industry standards and specifications; conducts educational sessions focused on concrete, wastewater, transportation and infrastructure at engineering conferences, onsite wastewater conferences and universities across the country; develops technical publications; assists with the NPCA Plant Certification Program; performs plant evaluations at precast concrete manufacturing facilities; and represents the association on codes and standards committees. Hanson is the staff liaison to NPCA’s Wastewater Treatment Products Committee, Gravity Grease Interceptor Subcommittee and Transportation Infrastructure Products Committee. She is also the vice chairman of ASTM Committee C27 on Precast Concrete Products.

Marc Harris, Arnold Insurance

OPER3 Navigating a Spiderweb of Terms and Conditions

Marc Harris is president and CEO of Arnold Insurance and has been an insurance professional for 26 years. Under his leadership, Arnold has grown to have nine offices in six states. He also founded and serves as executive director of Project 200, a global discipleship ministry. He has been happily married to his wife, Jennifer, for 26 years and has three children, Gavin, Madelyn and Marcus, who now runs the agency’s Denver office.

David Jablonsky, ALP Supply

PQSII – PQS Level II – Production

David Jablonsky is executive vice president and a member of the leadership team at ALP Supply. He has more than 25 years in the industry with the majority in precast and prestressed concrete with hands-on experience in manufacturing, engineering design, connection systems and erection and operational processes.
Todd Jones, ALP Supply
PQSII – PQS Level II – Production

Todd Jones is the technical services director for ALP Supply.

Clint Kilborn, Leviat
CP4 – Lifter Safety for Precast Products

Clint Kilborn brings years of expertise and product knowledge to the precast industry and regularly hosts safety training seminars for numerous precasters, demonstrating how to safely lift precast elements. He is currently the District Sales Manager of Precast for Leviat in the Pacific Northwest, Mountain States and Western Canada regions. Clint has served on the Board of Directors for PNPCA and as Chair of the Safety Committee for CPCI, and is involved in the Marketing Committee for CPCI as well.

Becky King, PCI
MS5 Social and Digital Media 101: Usage, Barriers and Measurement

Becky King is the managing director of marketing and education at PCI. She works directly with the PCI Marketing Council and Marketing committees and the PCI Education Activities Council. She leads the PCI marketing and education staff and the regional executive directors toward a strategic goal of increasing the relative market share and awareness of precast concrete. King holds a bachelor of science in business management from Elmhurst College in Elmhurst, Ill.

Michael Kraft, Kraft Curing Systems GmbH
CP8 – Raise Concrete Quality with Effective Temperature Monitoring: The Latest in Concrete and Ambient Temperature Measurement Technology

Michael Kraft is the managing director of Kraft Curing Systems, headquartered in Lindern, Germany, and Bristol, Pa. He has a bachelor’s degree from Cornell University and 30 years of experience in the international precast concrete industry. Kraft Curing, holding several international patents, has more than 1,300 accelerated concrete curing systems operating in precast, pipe, prestress, block, paver, roof-tile, tunnel segment and cast stone production facilities in 67 countries. Kraft has consulted on major international projects, including Nordstream I and II, the Port Said and Ismailia Tunnels under the Suez Canal in Egypt. He currently is developing carbon-dioxide curing methods in conjunction with a research grant from the German Space Agency at DLR.

Kimberly Kramer, Ph.D., P.E., S.E., F.ACI, Kansas State University
QC1 – Learning from the Past to Build Better Now

Kimberly Kramer is a faculty member at Kansas State University in the department of architectural engineering and construction science. She is a licensed structural and professional engineer in several states and is the recipient of the ACI Sustainability Award 2021. As a professor, she was named the G.E. Johnson Construction Science Endowed Chair. In addition to her nine-month faculty appointment at Kansas State, Kramer consults as the co-owner of the consulting company KDK Engineering LLC. Her consulting endeavors include performing as a structural professional education consultant, engineering design and condition assessments.

Download The Precast Show 2022 app at the Apple Store or Google Play for the most up-to-date floor plan.
AJ Krick, Smith-Midland Corp.

PQSII – PQS Level II – Production

AJ Krick is the chief financial officer of Smith-Midland Corp. and has been with the company since 2014. By applying lean principles, AJ and his team have doubled output with the same number of people, reduced processing time by 76%, reduced printing by 46% and increased collaboration and communication between all departments. He is a certified public accountant and holds a degree in accounting from James Madison University.

Tony D. Lehman, Hudson Lambert Parrott Walker

OPER1 You Never Give Me Your Money: Navigating Conditional Payment Terms on Bonded Projects

Tony D. Lehman has been a construction lawyer and business litigator for more than 20 years and is currently a partner at Hudson Lambert Parrott Walker. In dispute-resolution proceedings, he has represented owners, contractors, subcontractors, suppliers and program managers in federal and state courts in Georgia, Florida and Alabama. Additionally, Lehman has advised contractors, subcontractors and developers at the beginning of projects to help avoid disputes, and he has lectured and written extensively on construction law and construction contracting. Lehman participates in national and local bar associations and industry groups and is a past board member of the Florida Prestressed Concrete Association.

Sam Lines, Concrete Sealants Inc.

LM6 – They Named You Supervisor: Now What?
PQSIII – PQS Level III – Leadership

Sam Lines is the engineering manager for Concrete Sealants Inc. He began his precast concrete career in 1990 as a project designer for Hartford Concrete Products in Indiana. Later, he was promoted to quality engineer and eventually quality and safety director. Joining Concrete Sealants in 2005, Lines provides technical support, plant visits and education to precast plants around the United States. He holds MBA from Indiana Wesleyan University and is a certified Lean Six Sigma Master Black Belt. Additionally, Lines is on the NPCA Board of Directors, serves as the technical liaison for the Ohio Precast Concrete Association board of directors and is the vice chairman on the board of advisors for Wastewater Education 501c3.

Marc Maguire, Ph.D., University of Nebraska-Lincoln

TECH8-Fundamental Behavior, Mechanics and Design of Precast Concrete Insulated Wall Panels

Marc Maguire is an assistant professor in the Durham School of Architectural Engineering and Construction. He has been researching the design and behavior of insulated wall panels since 2007. He is the author of more than 100 publications and principal investigator of 46 research projects. His research interests include insulated wall panels, structural reliability, and non-destructive testing. Maguire is on the PCI Insulated Wall Committee and Design Standard Committee.

Michael A. Mahoney, P. Eng., M.A.Sc., FACI, Euclid Chemical

CP1 – Fiber Reinforced Concrete: New ACI Design Guides and Other Developments

Michael Mahoney is a professional engineer and the director of marketing and technology, fiber reinforced concrete, for the Euclid Chemical Company in Cleveland. Mahoney is a fellow and member of ACI and has served on various committees for NPCA and ASTM. He previously served as chairman for ACI sub-committee 544A on the Production and Applications of Fiber Reinforced Concrete and also is a board member and past president of the Fiber Reinforced Concrete Association. In 1997, he obtained his master’s degree in civil engineering from the Technical University of Nova Scotia, where he helped develop and patent a synthetic fiber for concrete reinforcement. Mahoney has coauthored several papers on the subjects of FRC, shotcrete, carbon footprint of fiber materials and innovative bridge systems. He currently directs research and marketing projects while educating engineers and contractors on the use of FRC.

Nicolas Marks, Continental Cement

QC4 – The Facts About Using Type 1L Limestone Cement

Marks has worked in the cement industry for more than 16 years, serving in various roles throughout multiple organizations responsible for technical service as well as process and quality management. Marks earned a degree in chemical engineering and later earned a master’s of business administration from Mississippi State University.
Mel C. Marshall, P. Eng.,
Mel C. Marshall Industrial Consultants Inc.

CP6 – Troubleshooting Precast Production:
Problems and Solutions
PQSI – PQS Level I – Production & Quality School

Mel Marshall is owner of Mel C. Marshall Industrial Consultants Inc., based in Delta, British Columbia, a company he started in 1980. He has been actively involved in the design, manufacture and construction of concrete products and structures. Mel has held the positions of general manager for one of the largest concrete pipe operations in Canada and president for a large Canadian wire and mesh manufacturing company. Marshall has more than 50 years of experience in the precast industry.

Brian D. Miller, P.E., MBA,
LEED AP, GCP Applied Technologies

MS6 Market Research: The Power of Data and Usage

Brian D. Miller, P.E., MBA, LEED AP, has more than 30 years of experience in the precast concrete, construction and concrete materials industries. He holds degrees in civil engineering and construction technologies and a master of business administration. Miller is the director of North America for the precast, manufactured and decorative concrete business segment at GCP Applied Technologies, where he previously served as global marketing director. Before joining GCP, he was the managing director of business development for PCI. He currently serves on several PCI committees, including the Marketing Council, and is chair of the Market Research and Metrics Committee.

Sean Monkman, Ph.D.,
P. Eng., CarbonCure Technologies Inc.

QC6 – Emerging Technology of Using Carbon Dioxide in Precast Concrete

Sean Monkman served as the senior vice president of technology development for CarbonCure Technologies since 2008. He oversees the company’s research and intellectual property efforts as it develops scalable carbon utilization technologies that create more sustainable concrete for use in the built environment. Monkman holds a doctoral degree in civil engineering from McGill University. His career has included more than 25 years working in concrete materials, including more than 15 years working on CO₂ utilization approaches. He is active within ACI’s Materials, Admixtures, Nanotechnology and Performance Specification committees and is the chair of the Sustainability committee. Monkman has authored more than three dozen papers and presentations on beneficial carbon dioxide utilization in concrete production and is a co-inventor on more than 100 issued and pending patents related to the work.

Claire (Qiwei) Nowasell,
PhD, LEED Green Associate, Lehigh Cement Company

TECH 1 Solutions to Lower Your Carbon Footprint – A Guide for Precast and Prestressed Concrete

Claire (Qiwei) Nowasell is a technical service engineer for Lehigh Cement, servicing New England and New York state. She is a member of ACI Committees 225, 306, and 710. She received her BS in material and science and engineering from Qingdao University of Technology, China, and earned her MS and PhD in civil engineering from the University of Missouri in Kansas City. Her research interests include supplementary cementitious materials and low-embodied carbon cementitious systems.

Monroe Porter, PROOF Management Consultants

**MS2 – Sales and Marketing Skills for Precasters**

Monroe Porter is a columnist, speaker and consultant known for his innovative, practical solutions to the problems businesses face. Porter has been conducting seminars and consulting business owners and employers about the value of their organization for more than 30 years. His presentations have earned him a reputation as a top speaker, while his problem-solving skills have made him an in-demand consultant for businesses hoping to improve their operations or open new opportunities for growth and marketing.

Scott Rasor, MBA, CPCU, Optimum Safety Management

**OPER4 Safety Data and Its Due Date: Emerging Trends in Manufacturing and Construction Accident Claims – Has the Dust Settled?**

Scott Rasor, MBA, CPCU, is executive vice president, insurance and risk management, at Optimum Safety Management. He has more than 35 years of experience in the commercial insurance industry, including serving as president of construction for Zurich North America Commercial Insurance for nearly a decade. He is a frequent speaker at industry events and functions and has written many articles on risk management strategies.

Jon Recknagel, P.E., Trimble Solutions USA

**CP7 – Proven 3D BIM Automation Tips to Significantly Decrease Detailing Time**

Jon Recknagel, is the application specialist at Trimble Solutions USA. He is an experienced structural engineer with nearly 10 years of working experience in the construction and civil engineering industry, specializing in precast concrete design. Recknagel earned his bachelor’s degree in civil engineering from Bradley University and has become a recognized authority on the use of BIM software to drive efficiencies in precast concrete construction.

Brian Roberts, NAPCO Precast LLC

**OPER1 You Never Give Me Your Money: Navigating Conditional Payment Terms on Bonded Projects**

Brian Roberts has been the chief financial officer of NAPCO Precast LLC since March 2020. His background includes more than 25 years of accounting and financial management experience related to manufacturing, commercial construction, real estate development, home building and multi-family residential structures. He is a strategic and operational CFO who is comfortable working with all departments to positively affect efficiency and profitability as opposed to just reporting results.

Larry Rowland, FACI, LEED A.P., ceEntek Inc

**TECH2 Architectural UHPC — Barriers and Challenges**

Larry Rowland is an accomplished speaker with more than 30 years of experience in the material supply and construction industries. He is an American Concrete Institute (ACI) Fellow and recognized expert on the topics of Ultra-High-Performance Concrete (UHPC), Architectural and Decorative concrete. He is a voting member of ACI 239 for UHPC and a member of the Organizing Committees for the 2016 and 2019 International UHPC Symposiums. Rowland is past Chair of the American Concrete Institute’s Decorative Concrete and Plastering Committees and recipient of the 2015 ACI Concrete Sustainability Award. He is a member of PCI’s Architectural Precast and Glass Fiber Reinforced Concrete Panel Committees and serves in numerous capacities in concrete industry professional associations.
Lisa Ryan, CSP, Grategy LLC

LM1 – Welcome Onboard! Simple Strategies to Keep Your New Hires from Jumping Ship
LM3 – Retention Strategies: How to Keep Your Top Talent from Becoming Someone Else’s

Lisa Ryan is an award-winning speaker holding a certified speaking professional designation with 13 years of industrial sales experience, including seven years in the welding industry. Ryan is the host of “Elevate Your Engagement Levels: What You Need to Know” on the Elite Expert Network and C-Suite Network, the creator of “The Seven Mistakes Managers Make to Crush Company Culture” video series and a best-selling author of 10 books, including “Manufacturing Engagement: 98 Proven Strategies to Attract and Retain Your Industry’s Top Talent.”

Justin Schneider, Assured Partners

OPER2 Don’t Get Caught Unprotected: Does Your Insurance Program Cover All the Insurance Requirements in Contracts You’re Signing?

Justin Schneider received his bachelor’s degree from Auburn University and his law degree from Western Michigan University, Thomas M. Cooley Law School. He was most recently a risk manager for Williams, where he oversaw the insurance placements and handled all contract redlines and negotiations for his division. Before joining Williams, Schneider worked as an in-house risk manager and contract negotiator for Crescent Point Energy US Corp in Denver.

Hugh C. Scott IV, P.E., Shea Concrete Products

LM2 – Taking a Shot at Your Title: Be Simple and Become Extraordinary
LM5 - Discussing Ideas for Recruiting Workers: A Panel Discussion
MS3 - Can You Use Pinterest to Promote Precast?: The Power of Social Media Marketing

Hugh Scott is a graduate of the University of New Hampshire’s Civil Engineering program. He works with Shea Concrete Products to increase customer and market awareness through multiple initiatives. Hugh has more than 15 years of field-based technical support, sales and management experience in the engineering, precast concrete, construction and renewable energy industries.

Gary R. Semmer, CIC, CWCA, Assured Partners

OPER2 Don’t Get Caught Unprotected: Does Your Insurance Program Cover All the Insurance Requirements in Contracts You’re Signing?

Gary R. Semmer, CIC, CWCA, is executive vice president and construction vertical practice leader at Assured Partners, an insurance and risk management broker based in Chicago. He has a bachelor of science degree from the University of Minnesota Carlson School of Business and is a Certified Insurance Counselor (CIC) and a Certified Work Comp Advisor (CWCA). Semmer has considerable insurance and risk management experience in the construction and real estate industries and has shared his expertise as a lecturer, author and speaker. He is a past president of the Independent Insurance Agents of Illinois and Associated Risk Managers of Illinois.

Ralph Sitterson, Keystone Insurers Group

OPER3 Navigating a Spiderweb of Terms and Conditions

Ralph Sitterson leads the Claims Management Division of Keystone and has more than 30 years of claims management expertise. He reviews large losses to ensure proper investigation, works in conjunction with insurance companies and third-party administrators to facilitate proper claims handling, works with clients to improve initial claim reporting and assists in identifying courses of recovery. His passion is to improve the management and ultimate outcome of losses through early involvement.

Steve Smart, County Materials Corp.

LM4 – Precast Project Management: Dealing with Multiple Expectations

Steve Smart is the technical resource engineer for County Materials Corporation based out of Indianapolis. He provides technical services for Indiana, Illinois and Missouri. He has been actively involved in the concrete industry for more than 40 years in marketing and production precast pipe, box culverts and three-sided bridge systems. Smart is a member of the Illinois Concrete Pipe Association, a former NPCA Board member, a founding member of the Derby City Chapter-ASHE and currently is president of IKO Concrete Pipe Association.
Ronald Thornton, P.E., Precast Concrete Association of New York

QC2 – Precast Concrete Retaining Walls

Ronald Thornton is a registered professional engineer with more than 30 years of experience in the concrete industry. He is a leading authority in the design, manufacturing and installation of precast concrete products for use in state, municipal and private projects including utility vaults, manholes, box culverts, prestressed bridge beams, retaining walls, sound walls, septic tanks and other products.

Steve Yates, CHST

OPER4 Safety Data and Its Due Date: Emerging Trends in Manufacturing and Construction Accident Claims – Has the Dust Settled?

Steve Yates, CHST, is founder and CEO of Optimum Safety Management, where he leads a team of safety professionals and support staff. Yates has a mechanical engineering background with experience in both manufacturing operations and construction technology. He is recognized for the development and implementation of effective safety management systems within many local, regional and national firms. He is also a former Occupational Safety and Health Administration outreach trainer. Yates conducted his undergraduate studies at the University of Illinois Chicago.

Ashley Smith, Smith-Midland Corp.

PQSII – PQS Level II – Production

Ashley Smith is the president of Smith-Midland Corp. in Midland, Va. He has been involved with NPCA for many years serving on several committees as both a member and chairman. He also is a past NPCA Chairman of the Board.

Todd Spindler, Sika Corp.

PQSII – PQS Level II – Production

Todd Spindler is the Midwest regional manager for Sika Corporation’s Concrete Division. He has nearly 30 years of experience in the concrete production, repair and protection industries and more than 25 years with Sika Corporation in a variety of roles. Spindler has been an active participant, officer and committee member in several local and national trade associations including NPCA, PCI and ACI.

Notes
Develop your workforce with NPCA’s Onboarding Program

- Set expectations, behaviors and cultures.
- Increase productivity and reduce learning curve.
- Build loyalty and trust.
- Find, attract and retain workers.

Through an annual subscription, you receive a resource manual and facility-wide access to a video series that gets new workers comfortable and up to speed quickly. Choose from a range of topics – from “Day in the Life of a Precaster” to learning about safety, quality and specific plant roles such as rebar assembly, form release application, product inspection and storage.

Email NPCA Professional Development Coordinator Melissa Newton at mnewton@precast.org to register or learn more.
Thanks To Our

INDUSTRY PARTNERS

Industry Partners sponsor or advertise for both NPCA and PCI to achieve the status of Industry Partner at The Precast Show® 2022.

al.mullenbach@glpolymers.com
Reinforcing confidence in your concrete. Synthetic reinforcing fibers deliver three-dimensional reinforcement to your concrete, ensuring your reinforcement is always properly placed to deliver optimal performance. Reinforcement, Fiber Reinforcement - Steel, Fiber Reinforcement - Synthetic, Fiber Reinforcement - Blended
Concerned about the NEW OSHA Silica Rule?

Introducing a new line of high performing, in-form surface retarders including light, acid-etch and sandblast finishes.

PIERI® Architectural Precast Portfolio
Creating and Protecting Architectural Precast Finishes

GCP offers a full line of innovative products and technologies for the precast/prestressed concrete industry.

**PERFORMANCE**
High Performance Admixtures
- ADYA® Cast
- STRUX®
- DCI®

**FINISH**
PIERI® Architectural Products
- In-Form Surface Retarders
- Release Agents
- Finish Protection

**PROCESS**
- Innovative Technology
- CONCERA® admixtures
- DARASet® admixtures

Contact a GCP Precast Specialist to learn more about these high quality products and innovative technologies.

Grificote® and Cast-O-Magic®
CONCRETE FORM RELEASE AGENTS
VOC COMPLIANT, NSF CERTIFIED® AND BIOGRADABLE RELEASE AGENTS FOR ALL CONCRETE APPLICATIONS

THE PERFECT RELEASE

Industry Leading Performance and Quality
Trained technicians are available to visit your site, determine your needs and design the right product for you.
- Grificote FR-50 & PR-SS VOC – Workhorse Release
- Grificote LV-50 Plus – NSF Certified for Potable Water Release
- Grificote Bio-Gold – Environmentally Friendly Release
- Grificote CC-150 VOC – Premium Seasoning Agent
- Cast-O-Magic, Con-Solver and Liquid Chisel
- Corrosion Inhibitor for Steel Forms

National Concrete Masonry Association (NCMA) .. 1042
13750 Sunrise Valley Drive
Herndon, VA 20171
(703) 713-1900
www.ncma.org
info@ncma.org
NCMA represents the producers and suppliers of the manufactured concrete masonry and hardscape industry in the United States and Canada. NCMA advocates to safeguard the work of its members and promotes its members' products as the first choice for designers, builders and property owners so communities are improved and made more resilient.

National Concrete Masonry Association (NCMA) Lab . . . 943
The NCMA Research and Development Laboratory is dedicated to the scientific research and testing of manufactured concrete products and systems for both the Association and individual companies. The Laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017 and is equipped to perform nearly any physical research or testing of manufactured concrete products and assemblages.

National Precast Concrete Association (NPCA) .. 2027
1320 City Center Drive, Suite 200
Carmel, IN 46032
(317) 582-2320
www.precast.org
info@precast.org
NPCA has represented manufacturers of industrial plant-produced precast concrete products and the suppliers of products and services for the industry since 1965, providing members with the programs and information required to operate a successful precast plant. NPCA operates the industry's largest and most comprehensive plant certification program, which is accredited by the ANSI National Accreditation Board (ANAB).

Fabricating solutions since 1916.

We Manufacture:
- Floor Access Doors (Aluminum, Steel or Stainless Steel)
- Metal Grating
- Pump Station Accessories (Cable Holders, Guide Rail Supports, Hoists, etc.)
- Hatch Safety Nets and Hatch Safety Grates for Fall Through Prevention
- Mixer Mast Assemblies
- Ladders and Ladder Safety Posts
- Pump Tubes (for Submersible Propeller Pumps)
- Miscellaneous Metal Fabrication
- Rolling, Burning, Bending and Cutting Services

Water Treatment Solutions custom designs, installs, and services filter press-based water filtration and recycling systems for ready mix, precast, coring, resurfacing, and block producers in the concrete industry.

Applications Include:
- Recycle truck, mixer, and bucket wash-out water
- Reclaim aggregate, recycle aggregate wash waters
- Dewater or eliminate settling ponds
- Recycle grinding and polishing slurry
- Safe pH adjustment with CO2

Our systems provide customers with CRYSTAL CLEAR, CHEMICAL-FREE Recycled Water, turning concrete slurry of all types into manageable dry filter cake while providing 100% closed-loop, zero discharge solutions.

Call us – let us provide you with a Solution to your Water Treatment & Recycling needs.

The Precast Show 131
### Spacers - Metal
- **AFINITAS**: 1513
- **A-Lok Products Inc.**: 927
- **ALP Supply**: 2627
- **CONAC, Concrete Accessories**: 2227
- **Contractors Materials Co.**: 2019
- **CV International Plastics Inc.**: 712
- **D & L Supply Company Inc.**: 802
- **Dayton Superior**: 1027
- **Haala Industries**: 2203
- **Landcon/Starcon Lifting Anchors**: 1008
- **Leviat**: 1413
- **Omniduct**: 1940
- **Strike Products**: 2432
- **White Cap**: 2636

### Spacers - Plastic
- **AFINITAS**: 1513
- **A-Lok Products Inc.**: 927
- **ALP Supply**: 2627
- **Amifast**: 1343
- **Blackthorn LLC**: 2322
- **CF Metals**: 935
- **Clearstream Wastewater Systems Inc.**: 1841
- **CONAC, Concrete Accessories**: 2227
- **Contractors Materials Co.**: 2019
- **CV International Plastics Inc.**: 712
- **Dayton Superior**: 1027
- **Fister Inc.**: 2700
- **Haala Industries**: 2203
- **Leviat**: 1413
- **Paragon Products**: 2941
- **Polylok Inc. ZABEL**: 1323
- **Preco® Concrete Accessories / Durajoint® Waterstop**: 2019
- **Strike Products**: 2432
- **White Cap**: 2636

### Stair Nosings and Treads
- **D & L Supply Company Inc.**: 802

### Structural Beam Supports/ Components
- **D & L Supply Company Inc.**: 802
- **MCT Group Inc.**: 1101
- **Polylok Inc. ZABEL**: 1323

### Structural Load Bearings
- **D & L Supply Company Inc.**: 802

### Thermal Shear Connectors
- **AFINITAS**: 1513
- **Dayton Superior**: 1027
- **HK Composites**: 2807

### Trash Racks/Grating Assemblies
- **ALP Supply**: 2627
- **Inwesco Incorporated**: 2801

### Vents/Louvers - Fixed & Operable/Storm & Vandal Resistant
- **D & L Supply Company Inc.**: 802
- **Haala Industries**: 2203

### Wear Castings
- **Chehline Inc.**: 3008
- **TASSCO**: 1134
- **TEKA North America Inc.**: 721
- **Texaloy Foundry**: 1912

### Consulting Services

#### Consulting Services
- **Buildtech Sourcing**: 812
- **Pathfinder Systems**: 2817, 2919

### Crane and Rigging Related Inspections
- **Cranes 101**: 833
- **Irving Equipment LLC**: 427
- **Maema – Eurostone Machine USA**: 2510

### Crane and Rigging Related Training
- **Cranes 101**: 833
- **Irving Equipment LLC**: 427

### Retaining Wall Design & Evaluation
- **The AnchorFast Retaining Wall**: 2543

### Safety and Health Related Services
- **Cranes 101**: 833
- **Optimum Safety Management**: 2943

### Delivery Equipment

#### Delivery Equipment
- **BIK Boom Trucks**: 2741
- **Eletmatic Inc.**: 1443
- **Hiab USA Inc.**: 1701
- **Irving Equipment LLC**: 427
- **Palfinger Inc.**: 2119
- **PA-PO Industrial Systems LLC**: 515
- **Spancrete Machinery Corporation**: 2001

### Other Delivery Equipment
- **Advanced Concrete Technologies Inc.**: 2527
- **American Progress Group / UltraSpan**: 521
- **BIK Boom Trucks**: 2741
- **Eletmatic Inc.**: 1443
- **Hiab USA Inc.**: 1701
- **Irving Equipment LLC**: 427
- **Palfinger Inc.**: 2119
- **PA-PO Industrial Systems LLC**: 515
- **Spancrete Machinery Corporation**: 2001
- **Tucker's Machine & Steel Service, Inc.**: 1841

### Rigging Equipment
- **BIK Boom Trucks**: 2741
- **Blackthorn LLC**: 2322
- **Mazzella Companies**: 619

### Trailer Mounted Cranes
- **BIK Boom Trucks**: 2741
- **Clearstream Wastewater Systems Inc.**: 1841
- **Irving Equipment LLC**: 427

### Trucks
- **BIK Boom Trucks**: 2741
- **Clearstream Wastewater Systems Inc.**: 1841
- **Irving Equipment LLC**: 427
- **Tolpift North America**: 2309

### Used Delivery Equipment
- **BIK Boom Trucks**: 2741
- **Clearstream Wastewater Systems Inc.**: 1841
- **Del Zotto Products of Florida Inc.**: 733
- **Hiab USA Inc.**: 1701
- **Irving Equipment LLC**: 427
- **iwii Concrete Equipment Group**: 1227

### Forms/Molds

#### Accessories - Forms/Molds
- **CONAC, Concrete Accessories**: 2227
- **KVM International**: 1137
- **Pathfinder Systems**: 2817, 2919
- **Polylok Inc. ZABEL**: 1323
- **Sigma DG Corporation**: 2603

### Chamfer Strips
- **ALP Supply**: 2627
- **Blackthorn LLC**: 2322
- **CONAC, Concrete Accessories**: 2227
- **Contractors Materials Co.**: 2019
- **Dayton Superior**: 1027
- **Deslauriers**: 2737
- **Eletmatic Inc.**: 1443
- **Fister Inc.**: 2700
- ** Fitzgerald Formliners**: 613
- **Hamilton Form Company**: 2127
- **Hamilton Kent**: 3010
- **Helser Industries**: 1533
- **Newcastle Supply LLC**: 937
- **Nox-Crete Inc.**: 1001
- **OLMET ITALY S.R.L.**: 531
- **Pappadà Gino**: 1642
