 - No

Project Details

- Project Name:
NOTE: The Project Name should include the actual name of the project and all details provided in the Project Interview section should share relevant and identifying details as appropriate. This will allow us to better understand the significance of the submission and recognize the teams and experts behind the work.
- Project Location (City, State, Country):
- Project type: Select Category and Subcategory from dropdown list. [See list of categories and subcategories.](#)
- Project Descriptor: (150-word minimum)
- Project Start
- Project Completion Date: If project is not yet completed, include projected end date.
- Total Project Cost (USD):
- Total Cost of Precast Concrete (USD)
- Additional projects experts and team members: Include name and email

Project Objectives and Impact

Tell us about your project, focusing in on the objectives for the work and the impact and outcomes you achieved. Be descriptive! There is no word count limit. Entries will be judged on understanding the full scope and scale of the project, as well as full understanding of how precast was used to achieve the goals.

Purpose

Please share the objectives for this project and the deliverables requested by the ultimate customer(s). Please be sure to include what needs were core to the project – such as safety, resilience, environmental protection, etc. Wherever possible, explain how precast concrete contributed to the core needs.

Benefits

What measurable impact were the stakeholders looking to achieve through this work? Please include how precast contributed to achieving these results.

Critical Role of Precast

Share how precast played a central role in the solutions for the project. Be sure to share how precast uniquely contributed – owing to the speed of construction, durability of the use, reduced disruption to the environment, etc.

Long-Term Value

What is the long-term value of this project to its community/environment and how does precast help support?

Additional Details

What else should we know about this project and precasts role in its success? Please feel free to share your reasons on why this project should be recognized and how it represents the best of American infrastructure.

Supporting Materials

Please share as many as the following visuals as you can.

- Project Photos – please submit up to 10 photos
- Videos (optional) – please submit up to 5 videos
- Site plans, renderings and/or diagrams – please submit up to 10 images
- Media coverage – please submit any links or clips to media coverage this project may have earned. This can include any social media links you want to share.
- Client Testimonials or Feedback – please submit any feedback from the client and other teams that demonstrate the value of your contributions to this project

Project Entry Fee – Non-Members Only

Please submit your project entry fee of \$250. Projects that do not have their entries submitted by Aug. 31, 2026 will not be accepted for judging.

There is no fee for members of NPCA.
